# Preface

The mission of the Oncology Graduate School Amsterdam (Onderzoekschool Oncologie Amsterdam - OOA) is to educate graduate students in basic and clinical cancer research, and to ensure proper supervision and mentoring of graduate students in the Amsterdam region. OOA's graduate students are scientist-in-training who receive additional theoretical and practical education on various subjects related to cancer.

OOA is a joint venture of the Netherlands Cancer Institute (Nederlands Kanker Instituut - NKI) and the medical faculties VU Medical Center (VUmc) and Amsterdam Medical Center (AMC) of the Free University Amsterdam (Vrije Universiteit - VU) and the University of Amsterdam (Universiteit van Amsterdam- UvA), respectively. These organizations strive for excellence in research and education in oncology, the realization of which is promoted by their participation in OOA.

The OOA research program ranges from basic molecular biology to clinical bedside research. It includes, for instance, fundamental studies on cellular signal transduction and the control of gene expression, but also clinical trials of new immunotherapeutic approaches and the development

of new tools to evaluate the quality of life in cancer patients. OOA organizes a range of educational activities, including specialized training courses, meet-the-expert sessions and an annual graduate student retreat.

This report describes the activities and scientific output of OOA in 2008. It includes detailed listings of our educational activities, such as training programs, and an overview of the scientific output, including listings of PhD theses completed and scientific papers published throughout the year 2008.

Executive Directors,

Prof.dr. G.A. Meijer (VU)  
Prof.dr. T.K. Sixma. (NKI)  
Prof.dr. J.P. Medema (UvA)

## Faculty and staff

The complete list of founding institutes' faculty and staff involved in educational activities and research projects conducted by OOA is provide in Annex 1.

A large, light gray chevron shape is positioned in the lower right quadrant of the page. It has a wide base on the left and tapers to a point on the right, creating a triangular form that covers most of the bottom half of the page.

general report

2

# 2. General report

## Educational activities

The core activity of OOA is training PhD students in conducting cancer research. For this purpose, OOA has developed a high-quality curriculum. In 2008, OOA organized various graduate training courses and an Annual Graduate Student Retreat.

All courses were evaluated by means of standardized evaluation procedures. In this way, OOA carefully monitors the quality of its courses. Based on the outcome of these evaluations, the training programs are being improved continuously.

A detailed description of all training courses offered in 2008 is provided in chapter 3 of this Annual Report.

genetic screens with retroviral cDNA expression libraries, and loss-of-function genetic screens with RNA interference libraries. In addition, advanced mouse models have been developed for the genetic dissection of cancer.

At the cellular level, processes like cell-cell communication, cell-cell adhesion, cell migration and proliferation are being studied. Metastasis, the spread of tumor cells to distant sites in the body, is the main cause of cancer lethality. The mechanisms of cancer metastasis are being investigated. Important mechanisms in the pathogenesis of cancer are studied including genetic susceptibility, viral oncogenesis, oncogene induced senescence, genomic instability, tumor stroma interactions and anti tumor immune responses.

## Research program

Research projects at OOA's institutes can be clustered under two main themes. The theme 'Experimental biology' covers 'Oncogenesis' and 'Tumor cell biology' as the main lines of research. The second main theme is 'Experimental clinical research' and covers 'Diagnosis of cancer' and 'Prevention and therapy of cancer'. Chapter 4 provides listings of all individual PhD projects conducted within these main themes. More detailed descriptions of these research programs and their output are provided in the annual reports of the founding institutes.

## Theme 1: Experimental biology

The development of cancer is frequently associated with aberrations in cell signalling and signal transduction pathways. Transformation of a normal cell into a fully malignant cell requires multiple (sequential) genetic alterations affecting key genes controlling essential cellular pathways involved in cell division, proliferation, and apoptosis. Studying the genes and proteins involved in these pathways should result in a better understanding of the processes of tumorigenesis and tumor progression and should contribute to the development of novel diagnostic tools and better treatment strategies.

By applying innovative research tools, novel components of the major cancer-relevant pathways may be discovered. Tools applied in research projects include high-throughput methods for genetic, epigenetic, transcriptomic and proteomic analyses. Examples are gain-of-function

## Theme 2: Experimental clinical research

This theme focuses on the identification of new methods for the diagnosis, prognosis and individualized treatment of cancer. Early detection of cancer greatly increases the chance of a favourable outcome.

The emerging and rapidly growing fields of molecular imaging and genomics provide new opportunities to study the unique biology of a specific malignant disease in an individual patient. Combining an integrated research approach with clinical data collection and evaluation allows for the development of highly valuable indicators for the diagnosis and prediction of disease outcome in the individual patient. In our research, modern state-of-the-art CT and MRI machines enable imaging of anatomical details with high precision. In addition, imaging techniques like SPECT, PET, PET-CT and MRI, provide non-invasive methods to obtain unique molecular and biological information at the tissue level *in vivo*. For the purpose of molecular imaging studies, novel reporter probes are being developed and evaluated in (pre)clinical studies. In addition, by using (advanced) mouse models available at the OOA institutes, new clinical strategies for molecular imaging are being developed.

High-throughput tools are being applied to measure genetic variation and improve the criteria for disease classification. These tools include expression micro-arrays and CGH arrays for human and mouse studies. Quantitative mass spectrometry is being applied in the search for proteins capable of distinguishing between diseased and disease-free states with high sensitivity and specificity. The newly identified

proteins may be used as specific cancer markers for routine non-invasive tests.

Cancer therapy is another important focus within this theme. This program includes research lines focused on targeted therapy, both by medical and radiotherapeutic means. Patient-tailored therapy should ensure that the benefits of a treatment are optimized and that patients who are unlikely to benefit, are spared the side-effects of treatment. The research projects include preclinical evaluation and clinical application of the new generation of molecular targeted therapies and anti-angiogenic agents against novel cellular targets in the tumor and its environment. The pharmacological optimization of conventional cytotoxic drugs is another line of research that is being studied.

The theme "Experimental clinical research" also focuses on passage of the blood-brain barrier by drugs. Inadequate passage of the blood-brain barrier is generally considered a major cause of the lack of efficacy of systemic chemotherapy against intracranial malignancies.

Yet another research line is focused on immune therapy. New immunotherapeutic approaches for the treatment of malignant disorders are being investigated. The impact of vaccination in the adjuvant and primary treatment settings is being explored.

Projects focused on radiotherapy and surgery is directed at the clinical implementation and optimization of 4-dimensional, image-guided approaches to improve local disease control by radiation treatment and to reduce toxicity to normal tissue.

In the gene therapy area, clinical trials are evaluating gene therapy in malignancy with the current focus on optimal targeting of tumors and improving viral vector efficacy.

## PhD projects and students

Overall, 356 PhD projects were actively elaborated throughout 2008. The names of the PhD students at the three OOA institutes and the projects in which they participated are listed in chapter 4.

Of all PhD projects, 17% was funded by the participating institutes themselves (primary funding; 'eerste geldstroom'); 19% was financed by public funds (secondary funding; 'tweede geldstroom'), 44% by research contracts from external organisations including cancer charity and industrial funds (tertiary funding; 'derde geldstroom') and 20% was financed by other funds (quaternary funding; 'vierde geldstroom').

A total of 48 students completed and defended their PhD thesis and obtained their PhD degree in 2008. Annex 3 provides the complete list of PhD students who obtained their degree in 2008 with details of their theses and graduation.

## International visitors

Training of PhD students can be stimulated and enhanced by having scientific interactions between students and foreign experts operating in the field of the students' research projects. OOA is part of a large international network of cancer researchers and, therefore, international guests from other research institutes visit OOA's institutes frequently to interact with OOA students and staff. Throughout 2008, we welcomed 83 international experts in various settings (Annex 2).

## Awards

Several PhD students and staff of the OOA institutes won prestigious awards and honors - scientific or otherwise - in 2008. Chapter 5 provides a listing of these awards and honors.

OOA has an excellent (inter)national status, as demonstrated by, amongst others, the large number of research projects granted in open national and international calls. Recent examples include 3 CTMM projects and 7 TI Pharma strategic Research Programmes next to multiple EU, KNAW and NWO grants, like the 'vernieuwinsimpuls'.

## Scientific publications

The OOA international reputation is also evident by the high quality of the published output of the three institutions in top scientific journals.

Research highlights in 2008, also reflecting current status of relevant research, were amongst others, the results of a study published by the research group of Ruud Brakenhoff (VUmc) in the *J. Natl. Cancer Inst.* Showing that HPV does not play a major role in squamous cell carcinogenesis in Fanconi anemia patients. Furthermore it was shown that the Fanconi anemia squamous cell carcinomas (SCC) are genetically similar to sporadic SCCs despite having a different etiology. Tom Wurdinger (VUmc) demonstrated, in collaboration with collaborators at Harvard Medical School, that a small regulatory microRNA, miR-296, has a major role in the upregulation of growth factor receptors on endothelial cells which is a key step in angiogenesis in e.g. glioma. Inhibition of miR-296 with antagonists reduces angiogenesis in tumor xenografts *in vivo* (*Cancer Cell*).

Ben Slotman (VUmc) et al published in collaboration with University Medical Center Groningen in the impact of treatment-related toxicity on health-related quality of life (HRQoL) among patients with head and neck squamous cell carcinoma treated with radiotherapy either alone or in combination with chemotherapy or surgery (*Journal of Clinical Oncology*).

Studying the mechanism of oncogene-induced senescence, a cellular process protecting against cancer, Daniel Peepers' (NKI) group described in collaboration with Wolter Mooi (VUmc) in *Cell* an

unexpected role for interleukins. They observed that these cytokines have an essential role in protecting cells against the proliferation-stimulating effects of activating oncogene mutations.

The group of Reuven Agami used a novel genetic screening approach to select micro RNAs (miRNAs) that target any gene of interest. This revealed that miR-221 promotes cancerous growth of glioblastomas by restricting the expression of the tumor suppressor p27. They also identified miR-372 and miR-373 as miRNAs that stimulate cellular migration, invasion and metastasis of breast tumors and uncovered the function of Dead End (DND1), a gene essential for germ cell survival and protection from germ-cell cancer (*Nature Cell Biology*).

The group of Bas van Steensel published their mapping of some 1,300 large domains that associate with Lamin (LADs) in *Nature*. These LADs represent a repressive chromatin environment, demonstrating that the human genome is divided into large, discrete domains that are units of chromosome organization within the nucleus. Anthony Uren and Jaap Kool in collaboration with the groups of Lodewyk and David Adams (Sanger centre, UK), highlighted the power of high throughput insertional mutagenesis screens as a cancer gene network discovery platform in cancer-predisposed p19ARF and p53 deficient mice in a paper in *Cell*.

Constitutional gene defects predispose to cancer in children. Such tumor predisposition syndromes can be recognized by specific patterns of morphological abnormalities. Johannes Merks published in *JAMA* that pediatric patients with cancer show a significantly higher prevalence of morphological abnormalities compared with controls. Specific patterns of morphological abnormalities indicate possible unrecognized tumor predisposition syndromes, but validation in an independent sample is needed.

Understanding how cells maintain genome integrity when challenged with (DSBs) is of major importance, particularly since the discovery of multiple links of DSBs with genome instability and cancer-predisposition disorders. Ionizing radiation is the agent of choice to produce DSBs in cells; however, targeting DSBs and monitoring changes in their position over time can be difficult. The research group of Jacob Aten published in *Nature Genetics* a procedure for induction of easily recognizable linear arrays of DNA double-strand breaks (DSBs) in nuclei of adherent eukaryotic cells by exposing the cells to alpha particles from a small Americium source (Box1).

The group of JP Medema showed that spheroid cultures of colon cancer stem cells (CSCs) contain expression of CD133, CD166, CD44, CD29, CD24, Lgr5, and nuclear beta-catenin, which have all been suggested to mark the (cancer) stem cell population. More importantly, by using these spheroid cultures or freshly isolated tumor cells from multiple colon carcinomas, they provided compelling evidence to indicate that the capacity to propagate a tumor with all differentiated

progeny resides in a single CSC. Single-cell-cloned CSCs can form an adenocarcinoma on xenotransplantation but do not generate the stroma within these tumors. Moreover, they can self-renew and are capable of multilineage differentiation. Further analysis indicated that the lineage decision is dictated by phosphoinositide 3-kinase (PI3K) signaling in CSCs.

A total of 1257 publications have been published (with participation) by researchers from the three institutes combined. Of these, 53 papers were published jointly by researchers from different participating institutes in OOA. Annex 4 provides the complete list of scientific publications in 2008.

## Facilities

The main goal of all research activities of the 3 OOA institutes is to better understand the development of cancer and to improve the perspectives of cancer patients. For this purpose, many state-of-the-art technologies are present and new initiatives have been developed. Information about innovative technologies is communicated at many occasions, including courses and the OOA retreat, and these technologies are open to PhD students within OOA. As a result, the OOA PhD students often have early access to novel techniques and can apply these in research.

State-of-the-art facilities are:

- Microarray facilities with high resolution oligonucleotide array and CGH arrays for mouse and human studies (VUmc, NKI)
- Oncoproteomics laboratory for protein and glycan profiling using mass spectrometry (VUmc, AMC)
- (Molecular) Imaging facilities (cyclotrons, GMP facilities, animal and clinical PET/CT-cameras and MRI-machines) enabling imaging of anatomical details with high precision (VUmc)
- Tissue microarray facility (VUmc)
- Robotics and screening facility, including high content imaging (NKI)
- Microscopy facility, including extensive confocal and electron microscopy (NKI, AMC)
- Flow cytometry facility (NKI, AMC)
- Extensive animal facilities (NKI)
- Tissue and Serum biobanks (NKI, VUmc)
- New animal facility (ARIA) (AMC)
- Genomics: MPS GS-FLEX sequencer (AMC)
- Lentiviral library for RNA-silencing for human and mouse (AMC)
- Mass spectrometry facility (AMC)

In addition, new initiatives are:

- Imaging Center (including training center) (VUmc)
- Central Clinical Trial Support (office) (VUmc, AMC)
- Phase I/II unit for clinical trials (VUmc)
- Biobanking (VUmc, AMC)
- Human monoclonal antibody phage display facility (VUmc)
- Mouse Clinic (NKI)
- Protein Expression Facility (NKI)

# educational activities

3

# 3. Educational activities

In line with its mission, i.e. providing graduate students education in oncology research, OOA organizes several advanced courses in the field of oncology annually. The educational program is drawn up by the Board of Directors based upon evaluations of previous courses, contemporary developments in cancer research, and educational needs expressed by PhD students as well as initiatives from the OOA faculty. OOA offers courses focused on a wide variety of topics.

In 2008, 7 courses and 5 Meet-the-Expert sessions were organized. Courses are usually restricted to about 15-20 graduate students to ensure optimal interaction between students and faculty. Courses are advertised on the OOA website and announced by e-mail to the PhD students. Courses included lectures given by (inter)national experts, demonstrations and practical training. In addition, the Annual Graduate Student Retreat was organized again in 2008.

Besides the specialized oncological courses mentioned below, the graduate students followed several general courses such as on biostatistics and epidemiology, on laboratory animal technology and on writing and (poster)presentations techniques in scientific English. These courses were organized by the AMC, VUmc and NKI.

## HPV: Secondary prevention and the new era

### Meet the Expert session with prof. dr. L. Gissmann and prof. dr. M. Stanley

Organization: Prof. dr. C.J.L.M. Meijer  
Date: 16 January  
Location: VUmc

This session, organized as part of a symposium was focussed on an in depth discussion with 2 experts on this field. Prof. Gissmann (German Cancer Research Center, Heidelberg, Germany) has excellent expertise on the development of optimized methods for the induction of immune responses against the early proteins of HPV 16, the prototype of cancer-related papillomaviruses.

Prof. Stanley (University of Cambridge, Cambridge, UK) leads a research group focusing on the prevention and treatment of human papillomavirus infection, which causes cervical cancer. Understanding the ways in which the immune system develops a response to the human papillomavirus is important if effective vaccines against viral-associated disease are to be produced. A search for the cellular and viral changes that could control the progression of neoplastic disease forms another area of research focus.

This session was attended by 14 PhD students. The overall evaluation rate was 8.4 (scale 1-10).

## Replication Stress and Genome Maintenance

Organization: prof. dr. H.P.J. te Riele  
dr. J. de Winter  
Date: 11 - 23 February  
Location: NKI, VUmc

During cell division, cells need to faithfully transmit their genetic information to daughter cells. In particular during S phase, the integrity of the genetic information is challenged e.g. by misincorporation of nucleotides by replicative or translesion polymerases or by stalling of replication forks at sites of DNA damage. In cancer cells deregulated cell cycle control leads to replication stress, which may be caused by inappropriate coordination of replication origin firing. The course focused on DNA damage that can occur during DNA replication and provided an overview of the cellular responses to replication stress. During the course, 8 speakers of international reputation gave a seminar. In addition, participants had an in-depth discussion with the speaker of the day. Discussions were chaired by two participants who prepared for this by reading two papers of the speaker.

## Cellular Oncology: Translating Basic Knowledge into Clinical Application

Organization: Prof. dr. G.A. Meijer  
Date: 5 - 8 March  
Location: VUmc

The genomic and proteomic revolution continues to have a tremendous impact on cancer and has provided unprecedented insights into its basic mechanisms. The current challenge to the medical-scientific community is to carry these new insights further and to translate these into new clinical applications. Ultimately, investigations will have to result in the identification of novel diagnostics and prognostic markers and of therapeutic targets towards prevention and clinical management of pathological conditions caused by aberrations of cell growth and homeostasis. During this 4-day meeting a broad range of topics were covered, including cancer biology, detection, diagnosis and therapeutic management.

A total number of 44 PhD students attended this symposium.

## The Microscopic, Macroscopic and Pathologic Anatomy of the Mouse

Organization: Prof. dr. R. van Noorden  
Prof. dr. W. Lamers  
Date: 17 - 20 March  
Location: AMC

Most biomedical PhD students perform animal experiments at some stage of their research career, but most students have never received practical instructions with respect to the anatomy, histology and pathological anatomy of experimental animals. For this reason, experimental animals are usually not subjected to a thorough and systematic inspection to assess whether, besides the local (expected) effects in the organ(s) under study, other organs are affected as well.

This annual course aims at providing insight(s) into the anatomy and histology of the mouse, presently the most frequently used animal species in cancer research. In addition, the course focused on the recognition of pathological changes in the mouse. During the course each student dissected either a male or a female mouse, to become acquainted with the topographic anatomy of this species. The microscopy part of the course focused on studying the architecture of normal and pathologically altered mouse tissues. During the practical part, recognition of cell and tissue types, and changes in architecture of tissues as a result of pathological processes, were studied microscopically.

In addition to standard staining techniques, functional staining techniques were demonstrated. This year the practical part of the microscopic anatomy has been done with computerized sections and computer assisted magnifications.

Of the total number of 25 participants, 18 were PhD students of the OOA, 1 assistant professor, 1 biotechnician, 1 medical practitioner and 4 master oncology students.  
The overall evaluation rate was 7.0 (scale 1-10).

## Clinical Oncology

Organization: Prof. dr. J.P. Medema  
Prof. dr. D. Richel  
Date: 16 - 20 June  
Location: AMC

During this course, a detailed insight into the epidemiology, screening, diagnosis and treatment of cancer, with an emphasis on breast and colorectal cancer was given. The course was designed to provide a framework for laboratory scientists (molecular biologists, chemists, biologists) on the day-to-day reality of cancer treatment in the clinic. It involved presentations on the current and future possibilities in diagnosis and treatments, on cancer epidemiology and screening. Moreover, this course was unique in that it allowed students to participate in multidisciplinary patient discussions where treatment regimens of patients are discussed, to witness an endoscopy demonstration and to sit in at a patient polyclinical visit. The program was spread out over 5 days, but in

parts of the program participants were divided (poli visit, multidisciplinary discussions). In effect the course was thus be a 3 day course for the participants. Importantly, it also included a meet-the professor session (see below).

A total of 11 students participated in the course. The overall evaluation rate was 8.0 (scale 1-10), including meet-the-expert session.

## Low-penetrance genes for colorectal cancer

Meet the Expert with prof. dr. I. Tomlinson

Organization: Prof. dr. J.P. Medema  
Prof. dr. D. Richel  
Date: 18 June  
Location: AMC

Prof. dr. Tomlinson (Molecular and Population Genetics Laboratory, Cancer Research UK, London Research Institute, UK) has outstanding expertise in the area of colorectal tumorigenesis. His research focuses on the discovery of genes that predispose to colorectal cancer and the roles of mutation and selection in tumorigenesis, with emphasis on the Wnt pathway. He has contributed to a large number of publications in high ranked journals.

This master class was part of the topical course, but could be attended by other PhD students as well. It will start with a seminar by professor Tomlinson himself and was followed by in depth discussions with the attendees.

A total of 16 students participated in this session.

## Basic Microscopy Course "In the Footsteps of Antoni van Leeuwenhoek"

Organization: Dr. J.A.M. Beliën  
Dr. L. Brocks  
Dr. W.A. van Cappellen  
Prof. dr. TWJ Gadella  
Dr. A.B. Houtsmailler  
Dr. K. Jalink  
Prof. dr. C.J. van Noorden  
Dr. L. Oomen  
Prof. dr. P.J. Peters  
Dr. E.A.J. Reits  
Time: 5 - 9 September  
Location: VUmc, AMC

This 5-day basic course covered a wide range of aspects of microscopy, starting with a short history of microscopy and basic principles of various forms of microscopy. Lectures, hands-on sessions covered the basics of image analysis and image processing, image measurement, TyhConfocal microscopy, confocal microscopy (live cell imaging), Fluorescence microscopy, electron microscopy. During the course samples were prepared and examined. The participants could bring their own purified proteins solutions after consulting with the organization first.

In the journal club key review papers were discussed on the theme 'The use of fluorescence in cell biology'. The papers were read by the students. Summaries of (parts of) the papers are given by students in the journal club.

A total of 20 students participated in the course. The overall evaluation rate was 3.8 (scale 1-5).

## Annual Graduate Student Retreat

Organization: Prof.dr. T. Sixma  
M. van der Velde  
F. Manuputty  
Time: 3 - 5 October  
Location: Texel

A highlight of the educational program is the Annual Graduate Student Retreat. This three-day retreat focuses entirely on research conducted by the graduate students themselves. At the retreat, students not only present their work as a poster in the first year of their participation and as an oral presentation in subsequent years, they are also in charge of chairing sessions, discussions. In recent years, students participated in peer review of presentations given by others in order to award the prize for the best poster and best presentation. In this manner, the retreat trains important skills in presentation and interaction but it also provides an overview of research conducted within OOA at an early stage of the student's career, contributing significantly to the interaction between different groups.

A total of 93 students participated in this retreat. The overall evaluation rate was 3.5 (scale 1-5).

## Drug Discovery and Development

Organization: Prof. dr. J.J. Neefjes  
Dr. B. Rodenko  
dr. H. Ovaa  
Time: 3 - 10 October  
Location: NKI

Chemical compounds are central in the treatment of disease. Novel compounds are entering the clinic and this will continue. How are such drugs generated and what can be expected in the future?

In this course, the development of drugs, including biologicals, is described from target discovery to chemical lead-optimization of potential drugs, toxicology and pharmacology, approval and final market-launch. This course will be given in collaboration with internationally recognized speakers from academia and industry.

Friday prior to the course (October 3) it was possible to join a crashcourse basic principles "chemical synthesis".

A total of 30 students participated in the course. The overall evaluation rate was 8.0 (scale 1-10).

## Somatic genome alteration in human prostatic carcinoma

Meet the Expert with prof. dr. B. Nelson

Organization: Prof. dr. P. Snijders  
Date: 31 October  
Location: VUmc

This session was organized as part of the CCA Translational Oncology Symposium 2008 on October 30.

Prof. dr. B. Nelson (The Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins) has discovered the most common known somatic genome alteration in human prostatic carcinoma cells. The DNA lesion, hypermethylation of deoxycytidine nucleotides in the promoter of a carcinogen-defense enzyme gene, appears to result in inactivation of the gene and a resultant increased vulnerability of prostatic cells to carcinogens. Another major interest pursued in his laboratory is the role of chronic or recurrent inflammation as a cause of prostate cancer.

During the 'Meet the Expert Session' participants discussed several papers of Prof. Nelson.

A total of 8 students participated in this session. The overall evaluation rate was 7.0 (scale 1-10).

## Mouse Models for Colorectal Cancer Research

Meet the Expert with prof. dr.

B. Cormier  
Organization: dr. R.J.A. Fijneman  
Date: 10 November  
Location: VUmc

Prof. dr. R.T. Cormier (University of Minnesota, Dept. of Biochemistry & Molecular Biology, Medical School Duluth, MN, USA) has outstanding expertise in the area of mouse models to investigate development of colorectal cancer (CRC). Research in his lab has focused on functional characterization of genetic modifiers of CRC. While identifying these genes directly in humans is difficult, mouse models can be used to clone cancer susceptibility genes whose human homologues can be evaluated clinically. The Min (Multiple Intestinal Neoplasia) mouse, which carries a dominant mutation in the Apc gene, has been shown to be a valuable model of human CRC. Projects in the lab include the use of transgenesis and targeted mutagenesis to study the role of (genetic) modifiers of Min such as Pla2g2a, PPARGamma, MUC2, EphA2, and MCT1; understanding how altered DNA methylation affects Min tumorigenesis; and identification of genes critical for intestinal cancer metastasis using transposon mediated mutagenesis.

During the 'Meet the Expert Session' participants were given the opportunity to discuss several papers with Prof. Cormier that focus on current high-throughput techniques to identify new cancer genes using in vivo mouse models of tumor development.

The seminar by dr. Cormier was part of a Mini-symposium on Mouse Models for Human Cancer Research.

A total of 7 students participated in this session. The overall evaluation rate was 8.5 (scale 1-10).

## **Advanced Microscopy Course “In the Footsteps of Antoni van Leeuwenhoek”**

Organization: Dr. J.A.M. Beliën  
Dr. L. Brocks  
Dr. W.A. van Cappellen  
Prof. dr. TWJ Gadella  
Dr. A.B. Houtsmuller  
Dr. K. Jalink  
Prof. dr. C.J. van Noorden  
Dr. L. Oomen  
Prof. dr. P.J. Peters  
Dr. E.A.J. Reits

Time: 3 - 12 November

Location: VUmc, AMC, NKI Participants of this advanced course attended 6 of 11 optional topics.

These topics included:

Quality control and characterization of confocal microscopes, Intracellular protein labeling and visualization by confocal and correlative EM, Calculation of Confocal FRET from Images of Sensitized Emission, Fluorescence life-time determination by time-correlated single-photon counting (TCSPC), Large-Scale Imaging scanner (LSI), Frequency-domain fluorescence lifetime imaging microscopy (FLIM), Spectral imaging microscopy and CLEM, Total internal reflection fluorescence (TIRF) and Spinning disk microscopy , 4Pi microscopy , Fluorescent redistribution after photobleaching (FRAP) and CRYO-Electron Microscopy and Tomography of biological sections: Bridging the gap between EM and X-ray.

A total of 20 students participated in this session. The overall evaluation rate was 8.5 (scale 1 - 10).

## **Chromosomal instability pathways in gastric cancer**

Meet the Expert with prof. dr. O. Monni and prof. dr. H. Grabsch

Organization: Dr. B. Carvalho  
Dr. N. van Grieken  
Prof. dr. G.A. Meijer

Time: 15 December

Location: VUmc

This session was part of a symposium “Etiology of Gastic Cancers”. An in depth discussion with the experts was focus of this session.

Prof. dr. O. Monni is leader of the gastrointestinal research group of the Section of Pathology and Tumour Biology (Leeds Institute of Molecular Medicine, Leeds University). Aim is to improve the outcome of patients with cancer of the upper or lower gastrointestinal (GI) tract using knowledge derived from large clinical trials/population based studies.

Research of Prof. dr. O. Monni is primarily focused on head and neck squamous cell carcinoma, gastric cancer and breast cancer. Integrated analyses of copy number and gene expression in clinical tumors and cell lines have illustrated that deregulation of hundreds of genes is associated with genomic losses and amplifications across the genome. A number of frequent tumor type specific copy number and gene expression alterations have been identified but the biological and pathophysiological significance of these alterations is still largely unknown. Interest is now to dissect the functional role of the genes that have been identified as deregulated due to genomic aberration in epithelial cancers.

A total of 7 students attended this session. The overall evaluation rate was 7.8 (scale 1-10).

# PhD research program

4

# 4. PhD research program

This chapter describes the 356 PhD projects conducted within the two main themes of the OOA research programs, with the names of the PhD students involved and their supervisor(s). Graduate students who obtained their PhD degree in 2008 are marked by means of an asterisk added to their name.

## Funding

- 1 Financed by participating OOA institute ("eerste geldstroom")
- 2 Financed by public funds ("tweede geldstroom")
- 3-4 Financed by private funds ("derde / vierde geldstroom")

## Theme 1 Experimental Biology

### Biochemistry (NKI)

A.C. Faesen	3D repertoire	Sixma	2005	2
J. Hausmann	Structural studies of autotaxium	Sixma	2008	3
F. Mattiroli	Structural and functional analysis of a novel E3 ubiquitin ligase consisting of the pcp's BMI1 and ING1B	Sixma	2006	3
A. Reumer	LI & Alu elements: Structural and functional analysis of human non-LTR retrotransposons	Sixma	2005	2
J.J. Smit	Ubiquitin conjugation	Sixma	2007	4
M. Vargas	Structural analysis of the mechanism of ubiquitin conjugation	Sixma	2004	2
<b>Cell Biology I (NKI)</b>				
J.I. van den Bout*	The role of $\alpha 3\beta 1$ integrin in the development and pathophysiology of the glomerulus	Sonnenberg	2000	3
Q. le Duc	The role of actomyosin contraction in the down-regulation of E-cadherin mediated cell adhesion	De Rooij	2007	3
S. Ellenbroek	Tiam1/Rac signaling and wnt/beta-catenin-induced tumorigenicity	Collard	2004	3
D. Elouarrat	Regulation of sirt1 and downstream targets by phosphoinositides		2005	3
E. Frijns	Controlling hemidesmosome dynamics by phosphorylation of residues on the integrin beta4	Moolenaar Sonnenberg	2007	4
A. Hajdo-Milasinovic	Ras en Rho signaling networks and epithelial-mesenchymal transition	Collard	2001	3
A. Houben	Autotaxin, a secreted lyso PLD: role in tumor progression	Moolenaar	2006	3
S. Huvveneers*	Cooperation between the SRC oncogene and integrin $\alpha v\beta 3$ in oncogenic transformations of epithelial cells	Danen	2003	3
M. Ketema	Analysis of the function of a novel nuclear envelope protein, nesprin 3 in anchoring the nucleus to the intermediate filament system	Sonnenberg	2005	2
C. Margadant	Generation of a mouse model for EBS-MD	Sonnenberg	2006	4
J. Meijer	Role of the chemokine SDF-1 and its receptor CXCR4 in carcinoma and melanoma metastasis	Roos	2003	3
S. Mertens	Initiation and progression of lymphomas and skin carcinogenesis in Tiam1 mutant mice	Collard	2001	3
B. Ponsioen	LPA receptor signaling	Moolenaar	2003	3
T. Rygiel	Function based screening for genes involved in invasion of epithelial tumor cells	Collard	2002	3
N. Sachs	Function of integrin-CD151 complexes in tumor cell invasion and metastasis	Sonnenberg	2004	3
D. Visser	TRPM7: a novel regulator of cytoskeletal tension: implications for cancer progression, invasion and metastasis	Moolenaar	2007	3

L. van Zeijl	Cell-cell connexin signalling: suppression of cell transformation	Moolenaar	2000	3
<b>Cell Biology II (NKI)</b>				
H. Albers	Modulation of antitoxin activity by small molecules	Ovaa	2007	2
C. Berkers	Chemistry-based functional proteomics, new tools for cancer biology	Oova	2004	1
S. van Deventer	Kinome and phosphatome knock-down	Neefjes	2008	4

awards

5

# 5. Awards

This chapter lists awards and honors won by staff and students involved in OOA throughout 2008. The lists are in alphabetical order of the recipients' last name.

Faculty and staff members of the OOA fulfilled numerous functions in national and international organizations, on scientific boards of scientific journals, as members of study sections, and as organizers or co-organizers of scientific meetings, workshops and congresses.

## Scientific awards and honors

### Faculty and staff

H. Bartelink (NKI) received a doctorate honoris causa from the Academia of Medicine in Gdansk, Poland.

I.E.M. Bultink (VUmc) won the NVLE award 2008.

B.A.C. Dijkmans (VUmc) received the Clemmensen lecture Award Denmark.

B.A.C. Dijkmans (VUmc) was awarded with lecture 'Interventions in very early stages of rheumatoid arthritis invited lecture' Istanbul Turkey.

J. Haanen (NKI) was appointed as Professor of Translational Immunotherapy of Cancer at the Leiden University.

G.J.L. Kaspers (VUmc) received the Nijbakker-Morra studentenprijs for Elly Schaafsma.

D. Peeper (NKI) was appointed as professor of Functional Oncogenomics at the Free University in Amsterdam.

D. Peeper (NKI) was elected as EMBO member.

D.M. Pegtel (VUmc) received a VENI Grant.

G.J. Peters (VUmc) won Eminent scientist of the year 2007 Europe in January 2008.

P.H.M. Savelkoul (VUmc) won the First Amsterdam Invention Award (Amsterdam Topstad).

T. Sixma (NKI) became member of the Royal Netherlands (Dutch) Academy of Arts and Sciences.

B. van Steensel (NKI) was elected as EMBO member.

I. van der Waal (VUmc) was awarded with the Honorary Membership of the Nederlandse

Vereniging voor Mondziekten, Kaak- en Aangezichtschirurgie Amsterdam.

I. van der Waal (VUmc) won The Scientific Award of the Spanish Society of Oral Medicine, Bilbao (Spain).

C.M.J.E. Vandenbroucke-Grauls (VUmc) won the APUA (Alliance for the Prudent use of Antibiotics) Leadership Award for exemplary leadership in controlling hospital infections and antibiotic resistance, Washington (USA).

### PhD students

F.E. Henken (VUmc) received a KWF/Dutch cancer society travel grant

J. Hodzic (VUmc) won the AACR-AstraZeneca Scholar-in-Training Award in San Diego (USA).

I. Ouwehand (VUmc) received the Travel Award Kobe (Japan).

S.J.A.M. Santegoets (VUmc) received a KWF/Dutch cancer society travel grant.

S.J.A.M. Santegoets (VUmc) won the AACR-PCF Prostate Cancer Research Recognition Award for Research Excellence in San Diego (USA).

L. van Baarsen (VUmc) won The VU-wetenschaps-prijs 2008.

J. Voorman (VUmc) was awarded with a Visiting Fellow Award National Cancer Institute by National Institutes of Health, Bethesda (USA).

W. Zwart (NKI) won the AvL-prize 2008 for young, promising NKI-scientists.

faculty and staff

# Annex 1.

# Faculty and staff of OOA

## FACULTY

Prof.dr. N.K. Aaronson (Theme 2) Department of Psychosocial Research and Epidemiology Netherlands Cancer Institute	Dr. J.G.N.M. Collard (Theme 1) Department of Cell Biology Netherlands Cancer Institute
Dr. R. Agami (Theme 1) Department of Tumor Biology Netherlands Cancer Institute	Dr. J. Crezee (Theme 2) Department of Department of Radiation Oncology Academic Medical Centre / Universiteit van Amsterdam
Dr. J.A. Aten (Theme 1) Department of Cell Biology and Histology Academic Medical Centre / Universiteit van Amsterdam	Prof.dr. G.A.M.S. van Dongen (Theme 1 and 2) Department of Otolaryngology-Head & Neck Surgery VU University Medical Center
Prof.dr. A. Begg (Theme 2) Department of Experimental Therapy Netherlands Cancer Institute	Dr. E.F. Eldering (Theme 1) Department of Experimental Immunology Academic Medical Centre / Universiteit van Amsterdam
Dr. R. Beijersbergen (Theme 1) Department of Molecular Carcinogenesis Netherlands Cancer Institute	Dr. D. Geerts (Theme 1) Department of Human Genetics Academic Medical Centre / Universiteit van Amsterdam
Prof.dr. R. Bernards (Theme 1) Department of Molecular Carcinogenesis Netherlands Cancer Institute	Dr. W.R. Gerritsen (Theme 2) Department of Medical Oncology VU University Medical Center
Prof.dr. A.J.M. Berns (Theme 1) Department of Molecular Genetics Netherlands Cancer Institute	Prof.dr. D.J. Gouma (Theme 2) Department of Surgery Academic Medical Centre / Universiteit van Amsterdam
Prof.dr. J.H. Beijnen (Theme 2) Division of Pharmacology Netherlands Cancer Institute	Dr M. A. Grootenhuis (Theme 2) Department of Pediatrics Academic Medical Centre / Universiteit van Amsterdam
Prof.dr. J.G. Borst (Theme 1) Department of Immunology Netherlands Cancer Institute	Prof.dr. T.M. van Gulik (Theme 2) Department of Experimental Surgery Academic Medical Centre / Universiteit van Amsterdam
Prof.dr. P. Borst (Theme 1) Department of Molecular Biology Netherlands Cancer Institute	Prof. Dr. A. Hagenbeek (Theme 1 and 2) Department of Hematology Academic Medical Centre / Universiteit van Amsterdam
Prof.dr. R.H. Brakenhoff (Theme 1 and 2) Department of Otolaryngology-Head & Neck Surgery VU University Medical Center	Dr. J. Haanen (Theme 1 and 2) Department of Immunology Netherlands Cancer Institute
Prof.dr. H. N. Caron (Theme 1 and 2) Pediatric Oncology Academic Medical Centre / Universiteit van Amsterdam	

**Prof. Dr. M. van Herk** (Theme 2)  
Department of Radiotherapy  
Netherlands Cancer Institute

**Prof.dr. O.S. Hoekstra** (Theme 2)  
Department of Nuclear Medicine  
VU University Medical Center

**Prof.dr. P.C. Huijgens** (Theme 1 and 2)  
Department of Haematology  
VU University Medical Center

**Dr T.J.M. Hulsebos** (Theme 1)  
Department of Neurogenetics  
Academic Medical Centre / Universiteit van Amsterdam

**Dr. K. Jalink** (Theme 1)  
Department of Cell Biology  
Netherlands Cancer Institute

**Prof.dr. H. Joenje** (Theme 1)  
Department of Human Genetics  
VU University Medical Center

**Dr. J. Jonkers** (Theme 1)  
Department of Molecular Biology  
Netherlands Cancer Institute

**Prof.dr. G.J. Kaspers** (Theme 2)  
Department of Paediatrics  
VU University Medical Center

**Prof.dr. C.C.E. Koning** (Theme 2)  
Department of Radiotherapy  
Academic Medical Centre / Universiteit van Amsterdam

**Dr. M. Kool** (Theme 1)  
Department of Human Genetics  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. Y. van Kooyk** (Theme 1 and 2)  
Department of Molecular Biology and Immunology  
VU University Medical Center

**Dr. K.K. Krishnadath** (Theme 1)  
Department of Gastroenterology and Hepatology  
Academic Medical Centre / Universiteit van Amsterdam

**Dr. A. B.P. van Kuilenburg** (Theme 1 and 2)  
Department of Clinical Chemistry  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. A.A. Lammertsma** (Theme 2)  
Department of Nuclear Medicine  
VU University Medical Center

**Prof.dr. Ch.R. Leemans** (Theme 2)  
Department of Otolaryngology-Head & Neck Surgery  
VU University Medical Center

**Prof. dr. A.G.J.M. van Leeuwen** (Theme 2)  
LaserCenter  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. F.E. van Leeuwen** (Theme 2)  
Psychosocial Research and Epidemiology  
Netherlands Cancer Institute

**Dr. F. van Leeuwen** (Theme 1)  
Department of Cellular Biochemistry  
Netherlands Cancer Institute

**Prof.dr. M. van Lohuizen** (Theme 1)  
Department of Molecular Genetics  
Netherlands Cancer Institute

**Dr. R.M. Luiten** (Theme 2)  
Department of Immunology  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. J.P. Medema** (Theme 1)  
Laboratory of Experimental Oncology and Radiotherapy  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. C.J.L.M. Meijer** (Theme 1 and 2)  
Department of Pathology  
VU University Medical Center

**Prof.dr. G.A. Meijer** (Theme 1 and 2)  
Department of Pathology  
VU University Medical Center

**Prof.dr. S. Meijer** (Theme 2)  
Department of Surgical oncology  
VU University Medical Center

**Prof.dr. H. Meijers-Heijboer** (Theme 1)  
Department of Clinical Genetics  
VU University Medical Center

**Prof. dr. W.H. Moolenaar** (Theme 1)  
Department of Cellular Biochemistry  
Netherlands Cancer Institute

**Prof.dr. J.M. Middeldorp** (Theme 1 and 2)  
Department of Pathology  
VU University Medical Center

**Prof.dr. J.J.C. Neefjes** (Theme 1)  
Department of Tumor Biology  
Netherlands Cancer Institute

**Prof. dr. C.J.M. van Noesel** (Theme 1)  
Department of Pathology  
Academic Medical Centre / Universiteit van Amsterdam

**Prof. dr. M.H.J. van Oers** (Theme 1 and 2)  
Department of Hematology  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. G.J. Ossenkoppele** (Theme 1 and 2)  
Department of Haematology  
VU University Medical Center

**Prof.dr. S.T. Pals** (Theme 1 and 2)  
Department of Pathology  
Academic Medical Centre / Universiteit van Amsterdam

**Dr. A. Perrakis** (Theme 1)  
Department of Molecular Carcinogenesis  
Netherlands Cancer Institute

**Dr. D. Peeper** (Theme 1)  
Department of Molecular Genetics  
Netherlands Cancer Institute

**Prof.dr. G.J. Peters** (Theme 2)  
Department of Clinical Oncology  
VU University Medical Center

**Prof.dr. P.J. Peters** (Theme 1)  
Department of Tumor Biology  
Netherlands Cancer Institute

**Prof.dr. P. Postmus** (Theme 2)  
Department of Pulmonology  
VU University Medical Center

**Prof.dr. D.J. Richel** (Theme 1 and 2)  
Department of Medical Oncology  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. H.P.J. te Riele** (Theme 1)  
Department of Molecular Biology  
Netherlands Cancer Institute

**Prof.dr. S. Rodenhuis** (Theme 2)  
Department of Internal Medicine  
Netherlands Cancer Institute

**Dr. E. Roos** (Theme 1)  
Department of Cell Biology  
Netherlands Cancer Institute

**Prof.dr. J.J.M.C.H. de la Rosette** (Theme 2)  
Department of Urology  
Academic Medical Centre / Universiteit van Amsterdam

**Prof.dr. J.H.M. Schellens** (Theme 2)  
Department of Internal Medicine  
Netherlands Cancer Institute

**Prof.dr. R.J. Scheper** (Theme 1 and 2)  
Department of Pathology  
VU University Medical Center

**Dr. A. Schinkel** (Theme 1)  
Department of Experimental Therapy  
Netherlands Cancer Institute

**Dr. J.H. Schornagel** (Theme 2)  
Department of Internal Medicine  
Netherlands Cancer Institute

**Prof. Dr. T. Schumacher** (Theme 1)  
Department of Immunology  
Netherlands Cancer Institute

## STAFF

### Netherlands Cancer Institute

#### Cell Biology

Dr. J.G. Collard  
Dr. C. Jalink  
Dr. E. Roos  
Dr. A. Sonnenberg

#### Molecular Carcinogenesis

Prof.dr. R. Bernards  
Dr. R. Beijersbergen  
Dr. A. Perrakis  
Prof.dr. T.K. Sixma

#### Cellular Biochemistry

Dr. W.J. van Blitterswijk  
Dr. N. Divecha  
Dr. F. van Leeuwen  
Prof.dr. W.H. Moolenaar  
Dr. H. Ovaa  
Dr. M. Verheij

#### Immunology

Prof.dr. J. Borst  
Dr. J.B.A.G. Haanen  
Dr. H. Jacobs  
Prof.dr. T.N.M. Schumacher  
Dr. F.A. Vyth-Dreese

#### Molecular Biology

Prof.dr. P. Borst (honorary staff member)  
Dr. J. Jonkers  
Dr. H. van Luenen  
Prof.dr. H. te Riele  
Dr. B. van Steensel

#### Tumor Biology

Dr. R. Agami  
Dr. M. Fornerod  
Dr. R.J.A.M. Michalides  
Prof.dr. J.J. Neefjes  
Prof.dr. P.J. Peters

#### Molecular Genetics

Prof.dr. A.J.M. Berns  
Dr. J. Hilkens  
Dr. P. Krimpenfort  
Prof.dr. M. van Lohuizen  
Dr. M. Snoek  
Dr. M.A. van der Valk

#### Experimental therapy

Prof.dr. A.C. Begg  
Dr. A. Schinkel  
Dr. F.A. Stewart  
Prof.dr. M.J. van de Vijver  
Dr. L.J. van 't Veer

#### Radiotherapy

B.M.P. Aleman  
Prof.dr. G.M.M.. Bartelink  
Dr. J.S.A. Belderbos  
Dr. R.W. de Boer  
Dr. M. Boersma

Dr. I. Bruinvis  
B.N.F.M. van Bunningen

Dr. E.M.F. Damen  
Dr. L.G.H. Dewit  
Dr. R.L.M. Haas  
Dr. A.A.M. Hart  
Dr. W. Heemsbergen  
Dr. M. van Herk

Dr. E.P.M. Jansen  
Dr. J.V. Lebesque  
Dr. C.A.M. Marijnen  
E.A.H. Masselink  
Dr. B.J. Mijnheer  
Dr. L.M.F. Moonen  
Dr. C.R.N. Rasch  
Dr. P. Remeijer  
Dr. N.S. Russell  
J.G. Salverda  
Dr. C. Schneider  
Dr. J. Stroom  
Dr. J.C.M. Theuws  
Dr. C. van Vliet-Vroegindeweij  
Dr. C. Vrieling  
Dr. F.W. Wittkämper

#### Medical Oncology

Dr. J.W. Baars  
Dr. P. Baas  
Drs. E.M. Bais  
Prof.dr. J.H. Beijnen  
Dr. J.P. de Boer  
Dr. W.W. ten Bokkel Huinink  
Dr. W. Boogerd  
Dr. H. Boot  
Dr. J.A.. Burgers  
Dr. A. Cats  
Prof.dr. G.C. de Gast  
L. Gualthérie van Weezel  
Dr. J.B.A.G. Haanen  
Dr. A. Huitema  
Dr. J.M. Kerst  
Dr. S.C. Linn  
Dr. A. Lukas  
Dr. H. Neering  
Prof.dr. S. Rodenhuis  
Dr. J.H.M. Schellens  
Dr. J.H. Schornagel  
Dr. M. Smits  
Dr. B.G. Taal  
Dr. M. van der Weide  
Dr. N. van Zandwijk

#### Surgical Oncology

Prof.dr. B.B.R. Kroon  
Dr. A.J.M. Balm  
Dr. A. Bex  
Dr. M.W.M. van den Brekel  
Dr. D.R. Buitelaar  
Prof.dr. M.P.M. Burger  
Dr. J. ten Cate  
Dr. F. van Coevorden  
Dr. M.P. Copper  
Dr. W. van Driel  
Dr. G. Fons

Dr. S. Gonggrijp  
Dr. J.J. Hage  
Prof.dr. F.J.M. Hilgers  
Prof.dr. S. Horenblas  
Dr. H. Huitink  
Dr. C. Keijzer  
H. Klomp  
Dr. F.H.M. Kroon  
Dr. P.J.F.M. Lohuis  
Dr. M.A.C. Lubsen  
Dr. W. Meinhardt  
Dr. O.E. Nieweg  
Dr. H.S.A. Oldenburg  
Dr. H.G. van der Poel  
Dr. M. de Rie  
J.M. Ronday  
Dr. E.J.Th. Rutgers  
Dr. P.F.E. Schutte  
Dr. M. Scrámek  
Dr. M. Slot  
Dr. L.E. Smeele  
Dr. T. Stoppa  
Dr. I.B. Tan  
Dr. A.P. Timmers  
Dr. V.J. Verwaal  
Dr. M.J. Vrancken Peeters  
L.A.E. Woerdeman  
Dr. F.A.N. Zoetmulder

Prof.Dr. M. van de Vijver  
Dr. J. Wesseling  
**Radiology**  
A.P.E. Besnaard  
W. Koops  
Dr. R. Kröger

**Psychosocial Research and Epidemiology**  
Prof.dr. N.K. Aaronson  
Prof.dr. F.S.A.M. van Dam  
Prof.dr. W.J. van Harten  
Prof.dr. F.E. van Leeuwen  
Dr. M.A. Rookus

**Pathology**

# Annex 3.

# Theses completed

In 2008, 48 graduate students completed their graduate training and obtained a PhD degree. Their names, thesis titles, supervisors and institutes are listed below. The institute at which the research described in the theses was carried out is mentioned between brackets and may differ from the university where the PhD graduation took place.

Name	:	<b>van der Bij, G.J. (VUmc)</b>
Title	:	The impact of microenvironment and surgery on colon carcinoma metastasis; new concepts in development and therapy
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meyer S., Beelen R.M.J. and Van Egmond M.
Date	:	07-11-2008
Name	:	<b>van den Bout I. (NKI)</b>
Title	:	Identification and functional analysis of genes regulated by B1 and B3 integrins
University	:	Universiteit van Amsterdam
(co)Promotors	:	Berns A.J.M.
Date	:	27-03-2008
Name	:	<b>Brouwer J. (VUmc)</b>
Title	:	Diagnostic imaging in detecting recurrent and metastatic head and neck cancer
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Leemans C.R., De Bree R., Castelijns J.A. and Comans E.F.I.
Date	:	30-09-2008
Name	:	<b>Bruggeman S. (NKI)</b>
Title	:	Polycomb group genes in brain development and cancer Ink4a/ecf and beyond
University	:	Universiteit van Amsterdam
(co)Promotors	:	van Lohuizen, M.
Date	:	07-02-2008
Name	:	<b>Buffart T.E. (VUmc)</b>
Title	:	DNA copy number profiling of gastric cancer and its clinical implications
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meijer G.A. , Van der Velde C.J.H. , Van Grieken N.C.T. and Pinto Morais de Carvalho B.
Date	:	16-12-08
Name	:	<b>Bulkmans N.W.J. (VUmc)</b>
Title	:	Primary hrHPV testing in cervical screening: the arguments
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meijer C.J.L.M. , Snijders P.J.F. , Rozendaal L and Berkhof J.
Date	:	15-01-2008
Name	:	<b>Cillessen S.A.G.M. (VUmc)</b>
Title	:	Apoptosis in diffuse large B-cell lymphomas: from mechanisms to applications
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meijer C.J.L.M. and Oudejans J.J.
Date	:	11-06-2008

Name	:	<b>van Dijk J. (VUmc)</b>
Title	:	Quality of life and psychosocial functioning of Retinoblastoma survivors in the Netherlands
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Cohen-Kettenis P.T., Huisman J., Imhof S.M. and Moll A.C.
Date	:	5-12-2008
Name	:	<b>Duursma A.M. (NKI)</b>
Title	:	Molecular dissection of Cdc6 and the miR-148 family : two stories with common themes
University	:	Universiteit Leiden
(co)Promotors	:	Neefjes J.J. and Agami R.
Date	:	14-05-2008
Name	:	<b>Ekhart G.C. (NKI)</b>
Title	:	Pharmacogenetics and Pharmacokinetics in high-dose alkylating chemotherapy
University	:	Universiteit van Utrecht
(co)Promotors	:	Beijnen, J.H., Rodenhuis S. and Huitema A.D.R.
Date	:	22-09-2008
Name	:	<b>Engelsma D. (NKI)</b>
Title	:	Nuclear Export Signals:Small Domains with Large Impact
University	:	Universiteit Leiden
(co)Promotors	:	Neefjes J.
Date	:	10-10-2008
Name	:	<b>Epping M. (NKI)</b>
Title	:	Functional Genetic screens as tools to discover signaling pathways targeted by cancer drugs
University	:	Universiteit van Utrecht
(co)Promotors	:	Bernards R.
Date	:	18-03-2008
Name	:	<b>van Galen J.C. (VUmc)</b>
Title	:	Expression analysis of stress-induced apoptosis pathway regulating genes in B-cell lymphomas
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meijer C.J.L.M., Oudejans J.J. and Raaphorst F.M.M.
Date	:	19-11-2008
Name	:	<b>Gallegos Ruiz M.I. (VUmc)</b>
Title	:	Therapeutic Targets and Biomarkers in Lung Cancer
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Giaccone G., Smit E.F., Rodriguez J.A. and Ylstra B.
Date	:	22-04-2008
Name	:	<b>Geiger T. (NKI)</b>
Title	:	Oncogenic and Metastatic Functions of the Neurotrophic Receptor TRKB
University	:	Universiteit van Amsterdam
(co)Promotors	:	Berns A.J.M. and Peeper D.S.
Date	:	19-12-2008
Name	:	<b>de Gorter D.J.J (AMC)</b>
Title	:	Signaling pathways involved in B cell differentiation and disease. The role of Ral, Btk and Met.
University	:	Universiteit van Amsterdam
(co)Promotors	:	Pals S.T., Spaargaren M.
Date	:	03-04-2008
Name	:	<b>Hallaert D.Y.H. (AMC)</b>
Title	:	'From the cradle to the grave' Novel therapeutic approaches to attack the microenvironment in Chronic Lymphocytic Leukemia.
University	:	Universiteit van Amsterdam
(co)Promotors	:	van Oers M.H. and Eldering E.
Date	:	15-10-2008

Name	:	<b>Hannemann J. (NKI/AMC)</b>
Title	:	Gene expression profiling in breast cancer. A link between biology and clinical decision making.
University	:	Universiteit van Amsterdam
(co)Promotors	:	van de Vijver M. J. and Rodenhuis S.
Date	:	03-07-2008
Name	:	<b>Hardenberg G. (AMC)</b>
Title	:	The role of APRIL in immunity and tumorigenicity
University	:	Universiteit van Amsterdam
(co)Promotors	:	Medema J.P.
Date	:	24-04-2008
Name	:	<b>Hendriksen J. (NKI)</b>
Title	:	Intracellular routing of bet-catenin
University	:	Universiteit Leiden
(co)Promotors	:	Moolenaar W.
Date	:	19-06-2008
Name	:	<b>Hesselink A.T.H. (VUmc)</b>
Title	:	High-risk human papillomavirus testing in cervical screening: which assay?
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Snijders P.J.F., Meijer C.J.L.M. and Heideman D.A.M.
Date	:	15-01-2008
Name	:	<b>Hermsen B.B.J. (VUmc)</b>
Title	:	Risk profile of women at hereditary high risk for breast and ovarian cancer
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Verheijen R.H.M. and Kenemans P.
Date	:	16-04-2008
Name	:	<b>Hoozing M. (NKI)</b>
Title	:	Adverse effects pf treatment in long-term survivors of breast cancer
University	:	Universiteit Leiden
(co)Promotors	:	van Leeuwen F.
Date	:	9-1-2008
Name	:	<b>van Houdt I.S. (VUmc)</b>
Title	:	Cellular immune response in human melanoma, insights for a patient tailored therapy
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meijer C.J.L.M., Oudejans J.J. and Hooijberg E.
Date	:	14-05-2008
Name	:	<b>Huvemeers S. (NKI)</b>
Title	:	The regulation of Rho and Src signaling
University	:	Universiteit van Amsterdam
(co)Promotors	:	Berns A.J.M.
Date	:	30-10-2008
Name	:	<b>Jorritsma, A. (NKI)</b>
Title	:	Immunotherapy of melanoma : toward clinical application
University	:	Universiteit Leiden
(co)Promotors	:	Schumacher T.N.M. and Haanen B.A.G.
Date	:	04-09-2008
Name	:	<b>Keller A.M. (NKI)</b>
Title	:	The role of CD70/CD27 interactions at the dendritic cell/T cell interface
University	:	Universiteit van Amsterdam
(co)Promotors	:	Borst J.
Date	:	23-05-2008

Name	:	<b>Koppen A. (AMC)</b>
Title	:	Gene regulation by MYCN in neuroblastoma
University	:	Universiteit van Amsterdam
(co)Promotors	:	Versteeg R. and Valentijn L. J.
Date	:	25-03-2008
Name	:	<b>Kortlever R. (NKI)</b>
Title	:	Escaping Growth Arrest in Cancer
University	:	Universiteit van Utrecht
(co)Promotors	:	Bernards R.
Date	:	24-06-2008
Name	:	<b>Langerak, P. (NKI)</b>
Title	:	DNA Damage Tolerance: From Error Free UV-Damage Bypass to mutagenesis of Immunoglobulin Genes
University	:	Universiteit van Amsterdam
(co)Promotors	:	Borst J.
Date	:	01-02-2008
Name	:	<b>Lemos C. (VUmc)</b>
Title	:	Folate supplementation in chemotherapy: increase of efficacy versus induction of drug resistance.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Calhau C., Azevedo I. and Peters G.J.
Date	:	10-10-2008
Name	:	<b>Le Sage C. (NKI)</b>
Title	:	Identifying Cancer-Causing Noncoding RNAs
University	:	Universiteit Leiden
(co)Promotors	:	Neefjes J.
Date	:	10-01-2008
Name	:	<b>Leuken, R.J. van</b>
Title	:	Ubiquitination and deubiquitination involved in cell cycle progression
University	:	Universiteit Utrecht
(co)Promotors	:	Medema, R.H.; Wolthuis, R.M.F.
Date	:	18-09-2008
Name	:	<b>Molling J.W. (VUmc)</b>
Title	:	Invariant natural killer T cells and immunotherapy of cancer
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Scheper R.J., van den Eertwegh A.J.M., von Blomberg B.M.E., Bontkes H.J.
Date	:	23-05-2008
Name	:	<b>Moreno Jauge M. (VUmc)</b>
Title	:	Innate and adaptive tumour immunity: Role of invariant natural killer T cells.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Verheijen R.H.M., Scheper R.J., von Mensdorff-Pouilly S.C.T. and Bontkes H.J.
Date	:	26-09-2008
Name	:	<b>Mous R. (AMC)</b>
Title	:	Studies on the immune system in CLL
University	:	Universiteit van Amsterdam
(co)Promotors	:	van Oers M.H.J. and van Lier R.A.W.
Date	:	03-10-2008
Name	:	<b>Neijssen J. (NKI)</b>
Title	:	The Fate of Intracellular Peptides and MHC class I Antigen Presentation
University	:	Universiteit Leiden
(co)Promotors	:	Neefjes J.
Date	:	6-2-2008
Name	:	<b>Niers T.H.M. (AMC)</b>
Title	:	Coagulation, angiogenesis and cancer
University	:	Universiteit van Amsterdam
(co)Promotors	:	Büller H.R., Spek, C.A., Richel, D.J. and van Noorden C.J.F.
Date	:	17-06-2008

Name	:	<b>van Rhenen A. (VUmc)</b>
Title	:	Detection and characterization of leukemic stem cells
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	P.C. Huijgens
Date	:	25-04-2008
Name	:	<b>De Sousa Rocha N. (NKI)</b>
Title	:	Molecular basis for the control of motor-based transport of MHC class II compartments
University	:	Universiteit Leiden
(co)Promotors	:	Neefjes J.
Date	:	8-10-2008
Name	:	<b>Rygiel A.M. (AMC)</b>
Title	:	Genetic markers in malignant progression of Barrett's esophagus
University	:	Universiteit van Amsterdam
(co)Promotors	:	Peppelenbosch M.P., Fockens P., Krishnadath K.K., Bergman J.J.G.H.M.
Date	:	18-01-2008
Name	:	<b>Santegoets S.J.A.M. (VUmc)</b>
Title	:	Characterization of a human dendritic cell line; a prelude to allogeneic dendritic cell-based tumor vaccination.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Scherper R.J., de Gruyl T.D. and Van den Eertwegh A.J.M..
Date	:	12-03-2008
Name	:	<b>Veltkamp S. (NKI)</b>
Title	:	Clinical pharmacological and translation research on novel formulations of anticancer drugs
University	:	Universiteit van Utrecht
(co)Promotors	:	Schellens J.H.M.
Date	:	05-03-2008
Name	:	<b>Vogel M.J. (NKI)</b>
Title	:	Genomic mapping of heterochromatin components using DamID.
University	:	Universiteit van Amsterdam
(co)Promotors	:	van Lohuizen M.M.S.
Date	:	31-10-2008
Name	:	<b>Voortman J. (VUmc)</b>
Title	:	The proteasome a viable target in non-small cell lung cancer?
University	:	Vrije Universiteit Amsterdam,
(co)Promotors	:	Giaccone G.
Date	:	18-04-2008
Name	:	<b>Vrielink A. (NKI)</b>
Title	:	The Insulin-like Growth Factor (IGF) system in breast and colorectal carcinogenesis:dietary intervention and molecular
University	:	Universiteit Leiden
(co)Promotors	:	van Leeuwen F.
Date	:	17-1-2008
Name	:	<b>Witte M. (NKI)</b>
Title	:	Adoptive Transfer of Tumor-and Minor antigen-specific T cell reactivity in mouse models
University	:	Universiteit Leiden
(co)Promotors	:	Schumacher
Date	:	29-5-2008
Name	:	<b>Zijlstra J.M. (VUmc)</b>
Title	:	FDG PET Response Monitoring in Malignant Lymphoma
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Huijgens P.C. and Hoekstra O.S.
