# Preface

The mission of the Oncology Graduate School Amsterdam (Onderzoekschool Oncologie Amsterdam - OOA) is to educate graduate students in basic and clinical cancer research, and to ensure proper supervision and mentoring of graduate students in the Amsterdam region. OOA's graduate students are scientist-in-training who receive additional theoretical and practical education on various subjects related to cancer.

OOA is a joint venture of the Netherlands Cancer Institute (Nederlands Kanker Instituut - NKI) and the medical faculties VU University Medical Center (VUmc) and Amsterdam Medical Center (AMC) of the VU University Amsterdam (Vrije Universiteit - VU) and the University of Amsterdam (Universiteit van Amsterdam- UvA), respectively. These organizations strive for excellence in research and education in oncology, the realization of which is promoted by their participation in OOA.

The OOA research program ranges from basic molecular biology to clinical bedside research. It includes, for instance, fundamental studies on cellular signal transduction and the control of gene expression, but also clinical trials of new immunotherapeutic approaches and the development of new tools to evaluate the quality

of life in cancer patients. OOA organizes a range of educational activities, including specialized training courses, meet-the-expert sessions and an annual graduate student retreat.

This report describes the activities and scientific output of OOA in 2010. It includes detailed listings of our educational activities, such as training programs, and an overview of the scientific output, including listings of PhD theses completed and scientific papers published throughout the year 2010.

Executive Directors,

Prof.dr. G.A. Meijer (VU)  
Prof.dr. T.K. Sixma. (NKI)  
Prof.dr. J.P. Medema (UvA)

## Faculty and staff

The complete list of founding institutes' faculty and staff involved in educational activities and research projects conducted by OOA is provided in Annex 1.

A large, light gray chevron shape is positioned at the bottom of the page, pointing upwards. It consists of two slanted sides meeting at a point along the bottom edge.

**general report**

**2**

# 2. General report

## Educational activities

The OOA is a successful and large graduate school, with 392 PhD students, 120 faculty and 374 OOA staff members involved. Among the Dutch graduate research schools, OOA is one of the 13 schools within the field of 'medical sciences'. It is the only school specifically focusing on training in cancer research. Monitoring of the quality of research in the different institutes is performed by local committees at the participating institutes, e.g. a research institute or board.

The quality of the OOA is shown by its regular accreditation by the Royal Netherlands Academy of Sciences regularly, currently for the period 2009-2014.

The core activity of OOA is training PhD students in conducting cancer research. For this purpose, OOA has developed a high-quality curriculum. In 2010, OOA organized various graduate training courses and an Annual Graduate Student Retreat.

All courses were evaluated by means of standardized evaluation procedures. In this way, OOA carefully monitors the quality of its courses. Based on the outcome of these evaluations, the training programs are being improved continuously.

A detailed description of all training courses offered in 2010 is provided in chapter 3 of this Annual Report.

## Research program

Research projects at OOA's institutes can be clustered under two main themes. The theme 'Experimental biology' covers 'Oncogenesis' and 'Tumor cell biology' as the main lines of research. The second main theme is 'Experimental clinical research' and covers 'Diagnosis of cancer' and 'Prevention and therapy of cancer'. Chapter 4 provides listings of all individual PhD projects conducted within these main themes. More detailed descriptions of these research programs and their output are provided in the annual reports of the founding institutes.

## Theme 1: Experimental biology

The development of cancer is frequently associated with aberrations in cell signalling and signal transduction pathways. Transformation of a normal cell into a malignant cell requires multiple (epi)genetic alterations affecting key genes

controlling cellular pathways involved in cell division, proliferation and apoptosis. Studying genes and proteins involved in these pathways results in better understanding of tumor development, progression and therapy resistance and should contribute to the development of novel diagnostic tools and better treatment strategies.

Using innovative research tools, novel components of major cancer-relevant pathways are further unravelled. Tools applied in research projects include high-throughput methods for (epi)genetic, transcriptomic and proteomic analyses. Examples are large tumor cohort screens with CGH or expression arrays, gain-of-function genetic screens with retroviral cDNA expression libraries, and loss-of-function genetic screens with RNA interference libraries. Mechanistic studies using e.g. structural biology complement the functional studies. Advanced mouse models or sophisticated xenotransplant models have been developed for the genetic dissection of cancer.

At the cellular level, processes like cell-cell communication, cell-cell adhesion, cell migration and proliferation are being studied. Metastasis, the spread of tumor cells to distant sites in the body, is the main cause of cancer lethality. The mechanisms of cancer metastasis are being investigated. Important mechanisms in the pathogenesis of cancer are studied including genetic susceptibility, viral oncogenesis, oncogene induced senescence, genomic instability, tumor-stroma interactions and anti tumor immune responses.

## Theme 2: Experimental clinical research

Improvements in clinical care in oncology originate in improved detection, better treatment and translation of basic science findings in the clinic. The emerging and rapidly growing fields of molecular imaging and genomics provide new opportunities to study the biology of a malignancy in individual patients and allows for development of highly valuable indicators for diagnosis and prediction of disease outcome. Development of the 70-gene breast cancer predictor at the NKI has lead to the first FDA approved diagnostic screen for breast cancer. Modern state-of-the-art techniques like CT, MRI, SPECT and PET enable imaging methods with high precision and unique molecular and biological information at the tissue level. Reporter probes are being developed and evaluated. Highly developed mouse models emulating human tumor growth are used to follow drug sensitivity in several types of cancer and for

developing clinical strategies for imaging. High-throughput tools are applied to measure (epi)genetic alterations and improve disease classification, including expression micro-arrays and CGH arrays. Quantitative mass spectrometry is applied to search for proteins distinguishing diseased and disease-free states. Targeted cancer therapy, is yet another research focus. Patient-tailored therapy should ensure optimal treatment benefits. Projects include (pre)clinical evaluation the use of neoadjuvant treatment or the application of new molecular therapies and anti-angiogenic agents against novel targets in tumor and its environment. Pharmacological optimization of conventional cytotoxic drugs is an important line of research, as are passage of the blood-brain barrier by drugs and development of immune therapy. New immunotherapeutic approaches are being investigated and the impact of vaccination is being explored. Clinical trials are evaluating gene therapy with focus on optimal targeting and improving viral vector efficacy.

## PhD projects and students

Overall, 392 PhD projects were actively elaborated throughout 2010. The names of the PhD students at the three OOA institutes and the projects in which they participated are listed in chapter 4. Of all PhD projects, 17% was funded by the participating institutes themselves (primary funding; 'eerste geldstroom'); 19% was financed by public funds (secondary funding; 'tweede geldstroom'), 42% by research contracts from external organisations including cancer charity and industrial funds (tertiary funding; 'derde geldstroom') and 22% was financed by other funds (quaternary funding; 'vierde geldstroom').

A total of 52 PhD students completed and defended their PhD thesis in 2010. Annex 3 provides the complete list of PhD students who obtained their degree in 2010 with details of their theses and graduation.

## International visitors

Training of PhD students can be stimulated and enhanced by having scientific interactions between students and foreign experts operating in the field of the students' research projects. OOA is part of a large international network of cancer researchers and, therefore, international guests from other research institutes visit OOA's institutes frequently to interact with OOA students and staff. Throughout 2010, we welcomed 63 international experts in various settings (Annex 2).

## Awards

Several PhD students and staff of the OOA institutes won prestigious awards and honors -

scientific or otherwise - in 2010. Chapter 5 provides a listing of these awards and honors.

OOA has an excellent (inter)national status, as demonstrated by, amongst others, the large number of research projects granted in open national and international calls, including several of the prestigious new grants. The faculty is strongly represented in the 'vernieuwingssimpuls', the Veni-Vidi-Vici development grants for junior researchers and participates widely in CTMM projects and TI Pharma projects as well as in numerous EU integrated projects and networks of excellence. Funding also is strongly supported by the Dutch science foundation NWO and the cancer charity, KWF.

## Research highlights

Research highlights in 2010 included work of M. Gok of the group of C. Meijer. They showed that offering self sampling by sending a device for collecting cervicovaginal specimens for high risk HPV testing to women who did not attend regular screening is a feasible and effective method of increasing coverage in a screening programme. The response rate and the yield of high grade lesions support implementation of this method for such women (BMJ. 2010 Mar 11;340:c1040).

Kinases execute pivotal cellular functions and are therefore widely investigated as potential targets in anticancer treatment. S. Mir et al of the group of T. Wurdinger analyzed the kinase gene expression profiles of various tumor types and reveal the wee1 kinase to be overexpressed in glioblastomas. They demonstrated that WEE1 is a major regulator of the G(2) checkpoint in glioblastoma cells. Inhibition of WEE1 by siRNA or small molecular compound in cells exposed to DNA damaging agents results in abrogation of the G(2) arrest, premature termination of DNA repair, and cell death. Importantly, they showed that the small-molecule inhibitor of WEE1 sensitizes glioblastoma to ionizing radiation *in vivo*. Their results suggest that inhibition of WEE1 kinase holds potential as a therapeutic approach in treatment of glioblastoma (Cancer Cell 2010; 18: 244-257). Stereotactic body radiotherapy (SBRT) for stage I non-small-cell lung cancer (NSCLC) is associated with high local control rates. The impact of introducing SBRT in patients 75 years of age or older was studied using a population-based cancer registry. D.A. Palma of the group of S. Senan showed that SBRT introduction was associated with a 16% absolute increase in RT use, a decline in the proportion of untreated elderly patients, and an improvement in OS ( J Clin Oncol 2010; 28: 5153-5159).

Chromatin composition is still poorly characterized. The Van Steensel group has generated genome-wide high resolution binding maps of 53 chromatin components in *Drosophila* cells. They demonstrated that the genome consists of five discernable chromatin types. One represents a new repressive chromatin type that

covers about half of the genome and lacks classic heterochromatin markers whereas two represent transcriptionally active euchromatin.

Their results provide an overarching view of chromatin diversity and domain organisation in metazoan cells (*Cell* 2010;143(2):212-24).

M. Hözel and S. Huang, working in the group of R. Bernards, identified a mechanism of resistance to retinoic acid (RA) in neuroblastoma. This is a clinically relevant question, as this drug is used with only limited success to treat aggressive forms of this disease. Using a genetic approach, they identified cross talk between the NF1-RAS-MEK signalling cascade and RA signaling as a major cause of RA resistance in neuroblastoma.

Activation of the NF1-RAS-MEK cascade suppresses expression of the Retinoic Acid Receptor co-activator ZNF423, which they found to be essential for transcriptional activation by this receptor. They demonstrated that inhibition of MEK signaling with small molecules restores responsiveness to RA, providing a potentially powerful combination therapy to overcome RA resistance, a phenotype seen in over half of primary neuroblastomas (*Cell* 2010; 142: 218-29).

The group of M. Fornerod studied chromatin interactions with nuclear pore complex components. They showed that apart from their role in chromatin organisation at the nuclear envelop, the nucleoporins inside the nucleoplasm predominantly interacted with transcriptionally active genes away from the core complex thereby stimulating their expression (*Cell* 2010; 140: 360-71).

The benefits of preoperative biliary drainage, which was introduced to improve the postoperative outcome in patients with obstructive jaundice caused by a tumor of the pancreatic head, are unclear. N.A. van der Gaag of the group of D.J. Gouma compared in a multicenter, randomized trial, preoperative biliary drainage with surgery alone for patients with cancer of the pancreatic head. They showed that routine preoperative biliary drainage in patients undergoing surgery for cancer of the pancreatic head increases the rate of complications (*New Eng J Med* 2010; 362(2): 129-137).

In 2006, Van Oers et al published the results of the European Organisation for Research and Treatment of Cancer phase III trial EORTC 20981 on the role of rituximab in remission induction and maintenance treatment of relapsed/resistant follicular lymphoma (FL). At that time, the median follow-up for the maintenance phase was 33 months. In 2010, they reported the long-term outcome of maintenance treatment, with a median follow-up of 6 years. They confirmed the superior progression-free survival with rituximab maintenance in relapsed/resistant FL. The improvement of overall survival did not reach statistical significance, possibly because of the unbalanced use of rituximab in post-protocol salvage treatment (*J Clin Oncol* 28(17):2853) Despite the presence of mutations in APC or beta-catenin, which are believed to activate the Wnt signalling cascade constitutively, most colorectal

cancers show cellular heterogeneity when beta-catenin localization is analysed, indicating a more complex regulation of Wnt signalling. L. Vermeulen et al. of the group of JP Medema explored this heterogeneity with a Wnt reporter construct and observed that high Wnt activity functionally designates the colon cancer stem cell (CSC) population. In adenocarcinomas, high activity of the Wnt pathway is observed preferentially in tumour cells located close to stromal myofibroblasts, indicating that Wnt activity and cancer stemness may be regulated by extrinsic cues. In agreement with this notion, myofibroblast-secreted factors, specifically hepatocyte growth factor, activate beta-catenin-dependent transcription and subsequently CSC clonogenicity. More significantly, myofibroblast-secreted factors also restore the CSC phenotype in more differentiated tumour cells both in vitro and in vivo. They therefore propose that stemness of colon cancer cells is in part orchestrated by the microenvironment and is a much more dynamic quality than previously expected that can be defined by high Wnt activity (*Nat Cell Biol* 2010; 12(5): 468-476).

A total of 1587 papers have been published by researchers from the three institutes. Of these, 101 papers concerned collaborations between researchers from VUmc, NKI and AMC. Annex 4 provides the complete list of scientific publications in 2010. Annex 4 provides the complete list of scientific publications in 2010.

## Facilities

The main goal of all research activities of the 3 OOA institutes is to better understand the development of cancer and to improve the perspectives of cancer patients. For this purpose, many state-of-the-art technologies are present and new initiatives have been developed. Information about innovative technologies is communicated at many occasions, including courses and the OOA retreat, and these technologies are open to PhD students within OOA. As a result, the OOA PhD students often have early access to novel techniques and can apply these in research.

State-of-the-art facilities are:

- \* Deep sequencing facility (NKI, AMC)
- \* Microarray facilities with high resolution oligonucleotide array and CGH arrays for mouse and human studies (VUmc, NKI, UvA)\*
- \* Oncoproteomics laboratory for protein and glycan profiling using mass spectrometry (VUmc, AMC)
- \* (Molecular) Imaging facilities (cyclotrons, GMP facilities, animal and clinical PET/CT-cameras and MRI-machines) enabling imaging of anatomical details with high precision (VUmc)
- \* Tissue microarray facility (VUmc, AMC)
- \* Robotics and screening facility, including high content imaging (NKI)
- \* Microscopy facility, including extensive confocal and electron microscopy (NKI, AMC)
- \* Flow cytometry facility (NKI, AMC, VUmc)
- \* Extensive animal facilities (NKI, AMC)

- \* Tissue and Serum biobanks (NKI, VUmc)
- \* Genomics: MPS GS-FLEX sequencer (AMC)
- \* Lentiviral library for RNA-silencing for human and mouse (AMC)
- \* Mass spectrometry facility (NKI, VUmc, AMC)
- \* Protein Expression Facility (NKI)

In addition, new initiatives are:

- \* Imaging Center (including training center) (VUmc)
- \* Central Clinical Trial Support (office) (VUmc, AMC)
- \* Phase I/II unit for clinical trials (VUmc, AMC)
- \* Biobanking (VUmc, AMC)
- \* Human monoclonal antibody phage display facility (VUmc)
- \* Mouse Clinic (NKI)

# educational activities

3

# 3. Educational activities

In line with its mission, i.e. providing graduate students education in oncology research, OOA organizes several advanced courses in the field of oncology annually. The educational program is drawn up by the Board of Directors based upon evaluations of previous courses, contemporary developments in cancer research, and educational needs expressed by PhD students as well as initiatives from the OOA faculty. OOA offers courses focused on a wide variety of topics.

In 2010, 7 courses and 1 Meet-the-Experts session were organized. In addition, the Annual Graduate Student Retreat was organized again in 2010. Courses are usually restricted to about 15-20 graduate students to ensure optimal interaction between students and faculty. Courses are advertised on the OOA website and announced by e-mail to the PhD students.  
Courses included lectures given by (inter)national experts, demonstrations and practical training.

Besides the specialized oncological courses mentioned below, the graduate students followed several general courses such as on biostatistics and epidemiology, on laboratory animal technology and on writing and (poster)presentations techniques in scientific English. These courses were organized by the AMC, VUmc and NKI.

## Techniques in Cancer Genomics (Course, Symposium, Meet the Experts)

Organization: Dr. J. Jonkers  
Dr. B. Ylstra  
Date: 19, 24-26 February  
Location: NKI/VUmc

Technology is essential for basic cancer research and for translating our basic findings to the clinic. The overall aim of this OOA graduate course was to explore various state-of-the-art techniques used in cancer genomics, with a focus on their applications, their pros and cons, and the current challenges. Topics included massive parallel sequencing, different micro array applications, genome-wide analysis of non-coding RNAs as well as the use of model organisms and public databases in cancer genomics.

The first part of the one-week course focused on reading and discussing primary papers and reviews of 9 speakers. Students were expected to read the literature provided before the start of the course. Eight teams of 2-3 students presented a key paper of one of the speakers of the meeting, writing a critical review of a key paper of the second speaker, and preparing critical questions for the third speaker. Therefore, each team had to do in-depth reading of

primary papers of 3 different speakers. Conversely, each speaker was covered by 3 different teams of PhD students, ensuring a lively discussion during the PhD student presentations and during the Meet-the-Expert sessions. The paper of Prof. dr. Graeme Laurie (on ethics and privacy in genome research) was read and discussed by all PhD students.

The second part of the PhD course was combined with a 2-day symposium, including Meet-the-Expert session in the morning and talks in the afternoon.

The symposium program included 9 seminars given by 7 international and 2 national speakers and was attended by 250 scientists. The combination of the PhD course with the symposium allowed us to invite the best speakers in the field of techniques in cancer genomics.

A total number of 21 students participated in the course. The overall evaluation rate was 8.5 (scale 1-10).

The symposium was attended by 250 scientists.

## The Microscopic, Macroscopic and Pathologic Anatomy of the Mouse

Organization: Prof.dr. R. van Noorden  
Prof.dr. W. Lamers  
Date: 29 March - 1 April  
Location: AMC

Most biomedical PhD students perform animal experiments at some stage of their research career, but most students have never received practical instructions with respect to the anatomy, histology and pathological anatomy of experimental animals. For this reason, experimental animals are usually not subjected to a thorough and systematic inspection to assess whether, besides the local (expected) effects in the organ(s) under study, other organs are affected as well.

This annual course aims at providing insight(s) into the anatomy and histology of the mouse, presently the most frequently used animal species in cancer research. In addition, the course focused on the recognition of pathological changes in the mouse. During the course each student dissected either a male or a female mouse, to become acquainted with the topographic anatomy of this species. The microscopy part of the course focused on studying the architecture of normal and pathologically altered mouse tissues. During the practical part, recognition of cell and tissue types, and changes in architecture of tissues as a result of pathological processes, were studied microscopically.

In addition to standard staining techniques, functional staining techniques were demonstrated. This year the practical part of the microscopical anatomy has been

done with computerized sections and computer assisted magnifications.

A total number of 14 PhD students participated in the course. The overall evaluation rate was 7.3 (scale 1-10).

### Radiation Oncology

Organization: Dr. V. Lafleur  
Date: 31 May - 4 June  
Location: VUmc

In this course the rationale for the use of radiotherapy for oncological patients was elucidated. Topics of the course include: effects of irradiation on DNA, the cellular basis of radiotherapy, radiation injury to tumours and normal tissues, the physical principles of radiotherapy and the use of radiotherapy in the treatment of common malignant diseases. Practical work in treatment planning of a virtual patient was also part of the course. New developments in radiotherapy were addressed as well.

A total number of 20 students participated in the course. The overall evaluation rate was 4.0 (scale 1-5).

### Gene Regulation Networks

Organization: Dr. L. Wessels  
Dr. B. van Steensel  
Date: 8 - 18 June  
Location: NKI

This course aimed to offer an overview of new approaches to study complex gene regulatory networks. Rather than studying individual genes or single regulatory proteins, their view was broadened to the regulation of large sets of genes in the context of the entire genome, by a multitude of regulators.

Topics that were covered included: principles of regulatory systems; transcriptome analysis; transcription factor networks; genome-wide analysis of chromatin composition and chromosome folding. Emphasis were on the integration of high-throughput "wet-lab" and bioinformatics approaches, using a variety of model organisms (yeast, flies, worms, mammals).

Seven or eight international experts in the field will be invited to discuss their cutting-edge genomics and "network biology" approaches to gene regulation. Students had journal clubs on papers written by the visiting experts, wrote referee reports, attended seminars, and had extensive discussions with each guest speaker.

A total number of 17 students participated in the course. The overall evaluation rate was 8.0 (scale 1-10).

### Epigenetics and non-coding RNA

Organization: Dr. R. Agami  
Dr. F. van Leeuwen  
Date: 20 September - 1 October  
Location: NKI

It has recently become clear that regulation of gene expression is much more complex than previously anticipated. On top of the classical transcription factors, also non-coding RNAs and the epigenetic state of the genome are powerful gene regulatory mechanisms. Importantly, they affect normal development and impact disease states such as cancer. This OOA course offered an overview of this field - and provided insight into new discoveries and state-of the art knowledge of the subject.

The course started with an introduction about the topic of the course, presented by the course organizers. The rest of the two weeks included literature studies and journal clubs and seminars given by world-class speakers from leading laboratories all over the world, followed by meet-the-expert sessions. Eight international and national experts in the field have been invited to discuss their latest results. During the course students heard about different mechanisms of gene regulation by non-coding RNAs and epigenetics, cross-talk between chromatin and non-coding RNAs, methods on how to study non-coding RNAs and epigenetic factors in humans and other organisms and the power of using different model systems (yeast, worms, flies, zebrafish, mice).

Participating students were expected to read the background literature provided before the start of the course. Teams of 2-3 students gave presentations on a key paper from one of the expert speakers of the meeting, and prepared a critical review of a second key paper. This allowed a highly interactive discussions session with the speakers.

A total number of 21 students participated in the course. The overall evaluation rate was 8.15 (scale 1-10)

### Basic medical statistics for clinical and experimental research

Organization: Dr. M. Hauptman  
Dr. M. Lopez Yurda  
Dr. W. Heemsbergen  
Time: 4 - 15 October  
Location: NKI

The aim of the course was to explain statistical techniques for the evaluation of medical data from clinical and experimental research, and to provide an introduction into design aspects, methods of summarizing and presenting data, estimation, confidence intervals and hypothesis testing, including multivariable regression methods for the assessment of association.

The emphasis was on practical application and interpretation rather than theory. The course included lectures on general methods and concepts and their

application (4 half days) as well as tutorials on methods and examples specific for experimental (2 half days) and clinical research (4 half days). The use of the statistical software SPSS was demonstrated and example data sets with accompanying SPSS code were made available.

The course was well received. The average score was 7.0 (scale 1-10). A total of 47 students participated in the course.

### **Basic Microscopy Course "In the Footsteps of Antoni van Leeuwenhoek"**

Organization: Dr. J.A.M. Beliën

Dr. L. Brocks

Dr. L. Oomen

Dr. E.A.J. Reits

Dr. N van de Wel

Time: 11 - 15 October

Location: VUmc/AMC/NKI

This 5-day basic course covered a wide range of aspects of microscopy, starting with a short history of microscopy and basic principles of various forms of microscopy. Lectures, hands-on sessions covered the basics of image analysis and image processing, image measurement, electron microscopy, confocal microscopy and imaging (live cell imaging), fluorescence microscopy (time-lapse imaging and deconvolution) and correlative light and electron microscopy. During the course samples were prepared and examined. The participants could bring their own purified proteins solutions after consulting with the organization first.

A total of 16 students participated in the course. The overall evaluation rate was 4.1 (scale 1-5).

### **Annual Graduate Student Retreat**

Organization: Prof.dr. T.K. Sixma

P. Lagerweij

Time: 24 - 26 November

Location: Texel

A highlight of the educational program is the Annual Graduate Student Retreat. This three-day retreat focuses entirely on research conducted by the graduate students themselves. At the retreat, students not only present their work as a poster in the first year of their participation and as an oral presentation in subsequent years, they are also in charge of chairing sessions and discussions.

In recent years, student participated in peer review of the presentations given by others in order to award the prize for the best poster and best presentation. In this manner, the retreat trains important skills in presentation and interaction but it also provides an overview of research conducted within OOA at an early stage of the student's career, contributing significantly to the interaction between different groups: fundamental and clinical students.

A total of 116 students participated in this retreat. The course was rated excellent/good by 98% of the participants.

# PhD research program

4

# 4. PhD research program

This chapter describes the 392 PhD projects conducted within the two main themes of the OOA research programs, with the names of the PhD students involved and their supervisor(s).

awards

5

# 5. Awards

This chapter lists awards and honors won by staff and students involved in OOA throughout 2010. The lists are in alphabetical order of the recipients' last name.

Faculty and staff members of the OOA fulfilled numerous functions in national and international organizations, on scientific boards of scientific journals, as members of study sections, and as organizers or co-organizers of scientific meetings, workshops and congresses.

R. Agami (NKI) was awarded the 2010 ESCI Award for Excellence in Basic/Translational Research.

Y. Assaraf received a KNAW visiting Award.

T. Aukema (NKI) won the EANm Eckert & Ziegler Abstract Award 2010 at the Congress of European Association of Nuclear Medicine (EANM) in Wenen.

R.H.J. Beelen and M. Schilte (VUmc) won the award for Best poster at EuRoPD Strasbourg.

J. Beijen (NKI) was elected as a member of the KNAW, the Royal Netherlands Academy of Science.

J. Beijen (NKI) was awarded the Dr. Saal van Zwanenberg Prijs.

C. Berkers (NKI) received the 2010 Antoni van Leeuwenhoek prize because of her study of Proteasoomactivity.

P. Borst (NKI) received the Gebroeders Bruinsma Erepenning of the Vereniging tegen de Kwakzalverij.

L. van de Broek (VUmc) won the NVED poster prize 2010.

L. van de Broek (VUmc) won the ETRS poster prize 2010.

The Cancer Genomics Centre (CGC - NKI) received the 2010 Valorisation Award of the Netherlands Genomics Initiative (NGI).

E. Giovannetti (VUmc) received a EORTC-PAMM Best Poster Grant at the 31<sup>st</sup> Winter Meeting.

E. Giovannetti (VUmc) won the AISPI Young Investigator Grant at the XXXIV National congress of the Italian Society for Pancreas Study (AISPI) in Italy.

A.W. Griffioen (VUmc) was awarded with the Spinoza Chair of the Faculty of Medicine, University of Amsterdam.

G. Kirtschig (VUmc) won the Asia-Pacific Foundation: Clinical paper publication prize 2010; awarded by La Roche-Posay for the paper "Safety of topical corticosteroids in pregnancy".

P. Knipscheer (NKI) received a Heineken Young Scientist Award.

M. van der Kuip (VUmc) won the ESPID/Wyeth Fellowship Award.

F. van Leeuwen (NKI/VUmc) received the KWO prize of the cancer charity KWF.

H. Ovaa and T. Schumacher (NKI) received the Amsterdam Inventor Award.

I. van der Waal (VUmc) was awarded with Honorary Membership (2008) of the European Association of Oral Medicin (EAOM) at the 10<sup>th</sup> Biennial Conference in London in 2010.

I. van der Waal (VUmc) was elected as Honorary Fellow of the British Society for Oral Medicine (BSOM) at the 10<sup>th</sup> Biennial Conference in London in 2010.

I. van der Waal (VUmc) was awarded with Honorary Member (2009) of the Greek Association of Oral Medicine, announced on 16 March 2010.

faculty and staff

1  
annex

# Annex 1.

# Faculty and staff of OOA

## FACULTY

**Prof.dr. N.K. Aaronson**, Department of Psychosocial Research and Epidemiology, NKI (Theme 2)  
*Health-related quality of life assessment and behaviour in Clinical Oncology*

**Dr. R. Agami**, Department of Tumor Biology, NKI (Theme 1)  
*MicroRNAs and binding protein in cancer*

**Dr. J.A. Aten**, Department of Cell Biology and Histology, AMC (Theme 1)  
*Interactions of DNA double strand breaks and repair proteins in the formation of chromosome translocations and cell killing by ionizing radiation and other therapeutic agents.*

**Prof.dr. A. Begg**, Department of Experimental Therapy, NKI (Theme 2)  
*Mechanism and modulation of radiosensitivity*

**Dr. R. Beijersbergen**, Department of Molecular Carcinogenesis, NKI (Theme 1)  
*The RNAi strategy in target discovery*

**Prof.dr. R. Bernards**, Department of Molecular Carcinogenesis, NKI (Theme 1)  
*Functional genomics*

**Prof.dr. A.J.M. Berns**, Department of Molecular Genetics, NKI (Theme 1)  
*Mouse models for cancer*

**Prof.dr. J.H. Beijnen**, Division of Pharmacology, NKI (Theme 2)  
*Clinical pharmacology of anticancer drugs*

**Dr. C.U. Blank**, Department of Immunology, NKI (Theme 1 and 2)  
*Combating tumor immune escape and immunotherapy*

**Dr. E. Bleiker**, Psychosocial Research and Epidemiology, NKI (Theme 2)  
*Psychosocial Issues in Cancer Genetics*

**Prof.dr. E. Bloemena**, Department of Pathology, VUmc (Theme 1 and 2)  
*Molecular profiling of head & neck tumors*

**Prof.dr. J.G. Borst**, Department of Immunology, NKI (Theme 1)  
*Lymphocyte activation and survival*

**Prof.dr. P. Borst**, Department of Molecular Biology, NKI (Theme 1)  
*DNA base J*

**Prof.dr. E. Boven**, Department of Medical Oncology, VUmc (Theme 2)  
*Kinase inhibitors in renal cancer*

**Prof.dr. R.H. Brakenhoff**, Department of Otolaryngology-Head & Neck Surgery, VUmc (Theme 1 and 2)  
*Molecular mechanisms in precursor lesions and early stages of head & neck cancer for early detection*

**Prof.dr. R. de Bree**, Department of Otolaryngology-Head & Neck Surgery, VUmc (Theme 1 and 2)  
*Molecular mechanisms in precursor lesions and early stages of head & neck cancer for early detection*

**Prof.dr. H.N. Caron**, Paediatric Oncology, AMC (Theme 1 and 2)  
*Paediatric Oncology: new drug development, clinical trials and late effects*

**Prof.dr. J.A. Castelijns**, Department of Radiology, VUmc (Theme 2)  
*Imaging in head and neck cancer*

**Dr. J.G.N.M. Collard**, Department of Cell Biology, NKI (Theme 1)  
*Genetic control of invasion and metastasis*

**Dr. J. Crezee**, Department of Radiation Oncology, AMC (Theme 2)  
*Research focus is the development of new hyperthermia techniques and development and application of hyperthermia treatment planning.*

**Dr. J-H. Dannenberg**, Department of Gene Regulation, NKI (Theme 1)  
*The role of class I HDACs in transcription development and tumorigenesis*

**Dr. E. Dekker**, Department of Gastro-enterology and hepatology, AMC (Theme 2)  
*Colorectal cancer and polyps: population screening, advanced colonoscopic imaging, treatment and surveillance.*

**Prof.dr. G.A.M.S. van Dongen**, Department of Otolaryngology-Head & Neck Surgery, VUmc (Theme 1 and 2)  
*Molecular imaging of cancer for diagnosis in therapy selection with a focus on PET*

**Dr. E.F. Eldering**, Department of Experimental Immunology, AMC (Theme 1)  
*Regulated cell death - or apoptosis- in normal and pathological B- and T-lymphocyte development.*

**Prof.dr. P. Fockens**, Department of Gastro-enterology and hepatology, AMC (Theme 2)  
*Advanced diagnostic and therapeutic gastrointestinal endoscopy and colorectal cancer screening and clinical neurogastroenterology.*

- Dr. N.A.P. Franken**, Department of Radiation Oncology, AMC (Theme 2)  
*Radiobiology, DNA damage response, hyperthermia, chromosome aberrations, normal tissue damage.*
- Dr. D. Geerts**, Department of Human Genetics, AMC (Theme 1)  
*Developmental genes in neuroblastoma pathogenesis*
- Prof.dr. W.R. Gerritsen**, Department of Medical Oncology, VUmc (Theme 2)  
*Immunotherapy of prostate cancer*
- Prof.dr. D.J. Gouma**, Department of Surgery, AMC (Theme 2)  
*Development and optimization of treatment modalities for pancreatic cancer patients*
- Prof.dr. A.W. Griffioen**, Department of Medical Oncology, VUmc (Theme 2)  
*Tumor angiogenesis and drug therapy*
- Dr. M.A. Grootenhuis**, Department of Pediatrics, AMC (Theme 2)  
*Psychosocial consequences of childhood cancer*
- Prof.dr. T.M. van Gulik**, Department of Experimental Surgery, AMC (Theme 2)  
*Experimental surgery on colon cancer liver metastases*
- Prof.dr. A. Hagenbeek**, Department of Hematology, AMC (Theme 1 and 2)  
*1. Phase I, II and III clinical trials in the non-Hodgkin lymphomas (NHL) and 2. Suicide gene therapy*
- Dr. J. Haanen**, Department of Immunology, NKI (Theme 1 and 2)  
*Immunotherapy and immunomonitoring*
- Dr. A-P Haramis**, Department of Molecular Genetics, NKI (Theme 1)  
*Development roles of oncogenes and tumor suppressors in zebrafish*
- Prof.dr. W. van Harten**, Psychosocial Research and Epidemiology, NKI (Theme 2)  
*Early stage technology assessment, operations research and cancer rehabilitation*
- Prof.dr. J.J. Heimans**, Department of Neurology, VUmc (Theme 1)  
*miRNAs regulating angiogenesis in gliomas*
- Prof.dr. M. van Herk**, Department of Radiotherapy, NKI (Theme 2)  
*Radiotherapy: Image acquisition and processing*
- Dr. J. Hilkens**, Department of Molecular Genetics, NKI (Theme 1 and 2)  
*Gene involved in breast cancer progression and metastasis*
- Prof.dr. O.S. Hoekstra**, Department of Nuclear Medicine, VUmc (Theme 2)  
*Molecular imaging using PET for therapy selection and response monitoring*
- Prof.dr. P.C. Huijgens**, Department of Haematology, VUmc (Theme 1 and 2)  
*Targetted therapies in myeloid leukemia*

*Molecular mechanisms in precursor lesions and early stages of head & neck cancer for early detection*
- Prof.dr. A.G.J.M. van Leeuwen**, LaserCenter, AMC (Theme 2)  
*Biomedical photonics for functional and molecular imaging*

**Prof.dr. F.E. van Leeuwen**, Psychosocial Research and Epidemiology, NKI (Theme 2)  
*Epidemiology*

**Dr. F. van Leeuwen**, Department of Gene Regulation, NKI (Theme 1)  
*Epigenetic regulation of gene expression*

**Dr. S. Linn**, Department of Molecular Biology, NKI (Theme 2)  
*Molecular dissection of breast and lung cancer by differential drug sensitivity*

**Prof.dr. M. van Lohuizen**, Department of Molecular Genetics, NKI (Theme 1)  
*Role of polycomb-group genes in transcriptional repression and stem cell fate and tumorigenesis*

**Dr. R.M. Luiten**, Department of Dermatology, AMC (Theme 2)  
*Immunology of melanoma and autoimmune or inflammatory skin diseases*

**Prof.dr. J.P. Medema**, Laboratory of Experimental Oncology and Radiobiology, AMC (Theme 1)  
*Cell death induction and resistance in tumor cells and cancer stem cells*

**Prof.dr. C.J.L.M. Meijer**, Department of Pathology, VUmc (Theme 1 and 2)  
*HPV based early detection of cervical cancer precursors*

**Prof.dr. G.A. Meijer**, Department of Pathology, VUmc (Theme 1 and 2)  
*Molecular classification for early detection and personalized therapy in gastrointestinal (colon, gastric) cancer*

**Prof.dr. H. Meijers-Heijboer**, Department of Clinical Genetics, VUmc (Theme 1)  
*Genetic cancer predisposition with a focus on breast cancer*

**Dr. R. Michalides**, Department of Cell Biology, NKI (Theme 1)  
*Estrogen receptor and breast cancer*

**Prof.dr. W.H. Moolenaar**, Department of Cell Biology, NKI (Theme 1)  
*Lipid growth factor signaling*

**Prof.dr. J.M. Middeldorp**, Department of Pathology, VUmc (Theme 1 and 2)  
*EBV associated carcinogenesis and early detection*

**Prof.dr. C.J.J. Mulder**, Department of Gastro-enterology and hepatology, VUmc (Theme 2)  
*Celiac disease associated lymphomagenesis*

**Prof.dr. J.J.C. Neefjes**, Department of Cell Biology, NKI (Theme 1)  
*Antigen presentation by MHC class molecules and control of the immune response*

**Prof.dr. C.J.M. van Noesel**, Department of Pathology, AMC (Theme 1)  
1. *The role of the antigen receptor in lymphoma.* 2.  
*Antigen receptor rearrangement.*

**Prof.dr. M.H.J. van Oers**, Department of Hematology, AMC (Theme 1 and 2)  
*Pathogenesis and Immunotherapy of B cell malignancies*

**Prof.dr. C.J.F. van Noorden**, Department of Pathology, AMC (Theme 1)  
*Proteases and protease inhibitors in cancer*

**Prof.dr. G.J. Ossenkoppele**, Department of Haematology, VUmc (Theme 1 and 2)  
*Targetted therapies in myeloid leukemia*

**Dr. H. Ovaa**, Department of Cell Biology, NKI (Theme 1)  
*Chemistry and biology of ubiquitin-mediated proteolysis and antigen presentation*

**Prof.dr. S.T. Pals**, Department of Pathology, AMC (Theme 1 and 2)  
*Molecular pathogenesis of B cell malignancies and the role of heparan sulfates proteoglycans in tumorigenesis*

**Dr. A. Perrakis**, Department of Biochemistry, NKI (Theme 1)  
*Structural biology and structural biology methods*

**Dr. D. Peeper**, Department of Molecular Genetics, NKI (Theme 1)  
*Dissecting cancer cell signalling networks and identifying therapeutic cancer targets*

**Prof.dr. G.J. Peters**, Department of Clinical Oncology, VUmc (Theme 2)  
*Pharmacokinetics and response prediction in oncology*

**Prof.dr. P.J. Peters**, Department of Cell Biology, NKI (Theme 1)  
*Nanobiology*

**Prof.dr. P. Postmus**, Department of Pulmonology, VUmc (Theme 2)  
*Targetted drug therapy in lung cancer*

**Prof.dr. D.J. Richel**, Department of Medical Oncology, AMC (Theme 1 and 2)  
*New chemotherapeutic avenues for neoadjuvant and adjuvant treatment of cancer patients, targeted therapy.*

**Prof.dr. H.P.J. te Riele**, Department of Molecular Biology, NKI (Theme 1)  
*DNA mismatch repair / The Fanconi anemia pathway / cell cycle checkpoints*

**Prof.dr. S. Rodenhuis**, Department of Internal Medicine, NKI (Theme 2)  
*Breast cancer therapy and prediction of response*

**Dr. M. Rookus**, Psychosocial Research and Epidemiology, NKI (Theme 2)  
*Epidemiology*

**Dr. E. Roos**, Department of Cell Biology, NKI (Theme 1)  
*Mechanisms of metastasis*

**Prof.dr. J.J.M.C.H. de la Rosette**, Department of Urology, AMC (Theme 2)  
*Improving diagnosis and treatment of Urological cancers*

**Prof.dr. T. Ruers**, Department of Surgical Oncology, NKI (Theme 2)  
*Image guided surgery*

**Dr. S. Schagen**, Psychosocial Research and Epidemiology, NKI (Theme 2)  
*Cognitive function in Cancer patients*

**Prof.dr. J.H.M. Schellens**, Department of Internal Medicine, NKI (Theme 2)  
*Clinical pharmacology of anticancer drugs*

**Dr. A. Schinkel**, Department of Molecular Biology, NKI (Theme 1)  
*Genes and proteins involved in anti cancer drug resistance and pharmacokinetics*

**Prof.dr. T. Schumacher**, Department of Immunology, NKI (Theme 1)  
*Dissection and manipulating antigen-specific T cell immunity*

**Dr. G.J. Schuurhuis**, Department of Hematology, VUmc (Theme 2)  
*Disease profiling CML and AMC*

**Prof.dr. S. Senan**, Department of Radiation Oncology, VUmc (Theme 2)  
*Technological innovations in applied radiotherapy*

**Prof.dr. T.K. Sixma**, Department of Molecular Carcinogenesis, NKI (Theme 1)  
*Structural biology of proteins involved in ubiquitin conjugation in chromatin regulation, DNA mismatch repair and nicotinic receptor signaling.*

**Prof.dr. B.J. Slotman**, Department of Radiation Oncology, VUmc (Theme 1 and 2)  
*Technological innovations in applied radiotherapy*

**Prof.dr. E.F. Smit**, Department of Pulmonology, VUmc (Theme 2)  
*Targetted drug therapy in lung cancer*

**Prof.dr. P.J.F. Snijders**, Department of Pathology, VUmc (Theme 1 and 2)  
*HPV based early detection of cervical cancer precursors*

**Dr. A. Sonnenberg**, Department of Cell Biology, NKI (Theme 1)  
*Receptors for matrix adhesion*

**Dr. M. Spaargaren**, Department of Pathology, AMC (Theme 1)  
*Explore the molecular and functional aspects of: 1. chemokine- and B cell antigen receptor-signaling; 2. HGF/MET- and WNT-signaling; and 3. heparan sulfate proteoglycans (i.e., CD44v3 and Syndecan-1) and their modifying enzymes.*

**Dr. C.A. Spek**, Department of Experimental and Molecular Medicine, AMC (Theme 1 and 2)  
*Blood coagulation in pathophysiology*

**Prof.dr. B. van Steensel**, Department of Molecular Biology, NKI (Theme1)  
*Chromation genomics*

**Dr. F. Stewart**, Department of Experimental Therapie, NKI (Theme 2)  
*Radiation-induced vascular damage*

**Dr.ir. G.J. Streekstra**, Department of Biomedical Engineering and Physics, AMC (Theme 2)  
*Development and clinical evaluation of novel imaging and image analysis methods for diagnosis, treatment planning and per-operative imaging*

**Prof.dr. M.J.B. Taphoorn**, Department of Neurology, VUmc (Theme 2)  
*Quality of life in neuro oncology*

**Dr. L. Van 't Veer**, Department of Experimental Therapy, NKI (Theme 2)  
*Molecular pathology and molecular epidemiology of breast and colorectal cancer*

**Dr. L.J. Valentijn**, Department of Human Genetics, AMC (Theme1)  
*The role of MYCN in neuroblastoma*

**Prof.dr. I.M. Verdonck- de Leeuw**, Department of Otolaryngology/Head and Neck Surgery, VUmc (Theme 2)  
*Innovative care programs in oncology*

**Dr. M. Verheij**, Department of Radiotherapy, NKI (Theme 2)  
*Mechanisms, modulation and prediction of radiation-induced cell death*

**Prof.dr. H.W.M Verheul**, Department of Medical Oncology, VUmc (Theme 1 and 2)  
*Angiogenesis and phosphokinase as drug targets in gastrointestinal and renal cancer*

**Prof.dr. R. Versteeg**, Department of Human Genetics, AMC (Theme 1 and 2)  
1. *the molecular biology and genetic defects of several pediatric tumors (neuroblastoma, medulloblastoma and rhabdomyosarcoma)* and 2. *the overall organization of gene expression of the human genome.*

**Prof.dr. M. van de Vijver**, AMC (Theme 2)  
*Genetic alterations and gene expression profiles of solid tumors*

**Dr. J. Wesseling**, Department of Experimental Therapy, NKI (Theme 2)  
*Molecular markers to predict chemosensitivity in breast cancer*

**Dr. L. Wessels**, Department of Molecular Biology, NKI (Theme 1)  
*Bioinformatics and statistics*

**Dr. R.M.F. Wolthuis**, Department of Molecular Carcinogenesis, NKI (Theme 1)  
*Mechanisms of cell cycle progression in normal and cancer cells*

**Prof.dr.ir. H. Wijkstra**, Department of Urology, AMC (Theme 2)  
*Minimal invasive technology in diagnoses, therapy and follow-up of uro-oncology*

**Dr. T. Wurdinger**, Department of Neurosurgery, VUmc (Theme 1)  
*miRNAs regulating angiogenesis in gliomas*

## STAFF

### Netherlands Cancer Institute

#### Cell Biology

Dr. J.G. Collard  
Dr. M.E. Innocenti  
Dr. C. Jalink  
Dr. R.J.A.M. Michalides  
Prof.dr. W.H. Moolenaar  
Prof.dr. J.J. Neefjes  
Prof.dr. P.J. Peters  
Dr. H. Ovaa  
Dr. E. Roos  
Dr. A. Sonnenberg

#### Molecular Carcinogenesis

Prof.dr. R. Bernards  
Dr. R. Beijersbergen  
Dr. R. Wolthuis

# PhD Theses completed

In 2010, 52 graduate students completed their graduate training and obtained a PhD degree. Their names, thesis titles, supervisors and institutes are listed below. The institute at which the research described in the theses was carried out is mentioned between brackets and may differ from the university where the PhD graduation took place.

Name	:	<b>Aarts M. (NKI)</b>
Title	:	Gene targeting by single-stranded DNA oligonucleotides in mouse embryonic stem cells.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Te Riele H.
Date	:	08-04-2010
Name	:	<b>Badr C. (VUmc)</b>
Title	:	Bioluminescence imaging in glioblastoma: monitoring of biological processes and novel therapeutics.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Vandertop W.P., Wurdinger T. and Tannous B.A.
Date	:	23-09-2010
Name	:	<b>Bende R.J. (AMC)</b>
Title	:	B cell biology and the development of mature B cell lymphomas.
University	:	University of Amsterdam
(co)Promotors	:	Van Noesel C.
Date	:	08-04-2010
Name	:	<b>Berkers C.R. (NKI)</b>
Title	:	Probing proteasome activity and function : cancer diagnostics and mechanism of antigen processing.
University	:	University of Leiden
(co)Promotors	:	Overkleeft H.S., Neefjes J.J. and Ovaal H.
Date	:	05-10-2010
Name	:	<b>Bijnnsdorp I.V. (VUmc)</b>
Title	:	Mechanism of trifluorothymidine cytotoxicity and thymidine phosphorylase induced angiogenesis.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Peters G.J. and Kruyt F.A.E.
Date	:	09-06-2010
Name	:	<b>Bloem E. (AMC)</b>
Title	:	Understanding changes in quality of life in cancer patients; a cognitive interview approach.
University	:	University of Amsterdam
(co)Promotors	:	Sprangers H. and Koning C.C.E.
Date	:	03-11-2010
Name	:	<b>Börjesson P.K.E. (VUmc)</b>
Title	:	Radioimmunodetection and radioimmunotherapy of head and neck cancer.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Van Dongen G.A.M.S., Leemans C.R. and De Bree R.
Date	:	15-02-2010

Name	:	<b>Bosma I.</b> (VUmc)
Title	:	Cognitive dysfunction in glioma. Underlying mechanisms and consequences.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Heimans J.J., Stam C.J., Klein M. and Reijneveld J.C.
Date	:	07-05-2010
Name	:	<b>Bramer J.A.M.</b> (AMC)
Title	:	Prognostic factors and late effects of treatment in localised high grade extremity osteosarcoma.
University	:	University of Amsterdam
(co)Promotors	:	Caron H.N., Van Dijk C.N. and Schaap A.
Date	:	17-06-2010
Name	:	<b>Braunschweig U.</b> (NKI)
Title	:	Reading the maps: organization and function of chromatin types in <i>Drosophila</i>
University	:	University of Amsterdam
(co)Promotors	:	Van Lohuizen M.M.S. and Van Steensel B.
Date	:	04-11-2010
Name	:	<b>De Wilde J.</b> (VUmc)
Title	:	Molecular insights in HPV-mediated transformation with emphasis on hTERT.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Snijders P.J.F., Meijer C.J.L.M. and Steenbergen R.D.M.
Date	:	25-02-2010
Name	:	<b>Douw L.</b> (VUmc)
Title	:	Neural networks and brain tumors: the interplay between tumor, epilepsy and cognition.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Stam C.J., Heimans J.J., Reijneveld J.C. and Klein M.
Date	:	08-11-2010
Name	:	<b>Fabius A.W.M.</b> (NKI)
Title	:	Functional identification of novel modulators of the p53 and TGF signaling networks
University	:	University Utrecht
(co)Promotors	:	Bernards R. and Beijersbergen R.L.
Date	:	22-01-2010
Name	:	<b>Frederiks F.</b> (NKI)
Title	:	Function and regulation of the histone methyltransferase Dot1
University	:	University of Amsterdam
(co)Promotors	:	Van Lohuizen M.M.S. and Van Leeuwen F.
Date	:	29-10-2010
Name	:	<b>Gierman. H.J.</b> (AMC)
Title	:	How chromosomal domains effect gene expression in the human genome.
University	:	University of Amsterdam
(co)Promotors	:	Versteeg R.
Date	:	27-04-2010
Name	:	<b>Groen R.W.J.</b> (AMC)
Title	:	Micro environmental regulation of Multiple Myeloma and Malignant Lymphoma.
University	:	University of Amsterdam
(co)Promotors	:	Pals S.T. and Spaargaren M.
Date	:	18-11-2010
Name	:	<b>Haasbeek C.J.A.</b> (VUmc)
Title	:	Image-guided stereotactic radiotherapy for early stage lung cancer: techniques and clinical outcomes.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Senan S., Slotman B.J. and Lagerwaard F.J.
Date	:	03-03-2010

Name	:	Haber P. (AMC)
Title	:	Adaptation of Emerging Technologies to Urologic Oncology Applications.
University	:	University of Amsterdam
(co)Promotors	:	De la Rosette J.J.M.C.H. and Laguna M.P.
Date	:	16-11-2010
Name	:	Hajdo-Milasinovic A. (NKI)
Title	:	Rac1 and Rac3 in cell morphology and adhesion: brothers and foes
University	:	University of Amsterdam
(co)Promotors	:	Collard J.
Date	:	05-02-2010
Name	:	Holstege H. (NKI)
Title	:	Characteristics of the mouse and human breast cancer genome
University	:	University of Amsterdam
(co)Promotors	:	Berns A.J.M., Jonkers J.M.M. and Borst P.
Date	:	10-02-2010
Name	:	Kalverda B. (NKI)
Title	:	Genome function and organization in relation to the nuclear envelope.
University	:	University of Amsterdam
(co)Promotors	:	Van Lohuizen M.M.S. and Fornerod M.
Date	:	28-04-10
Name	:	Kok M. (NKI)
Title	:	Endocrine resistance in breast cancer - Gene expression profiling and modifications of the estrogen receptor.
University	:	University of Amsterdam
(co)Promotors	:	Rodenhuis S., Linn S.C. and Van 't Veer L.J.
Date	:	12-02-2010
Name	:	Kümmerlin I. (AMC)
Title	:	Renal tumours: A study on Epidemiology, Biopsies and cytological punctures.
University	:	University of Amsterdam
(co)Promotors	:	De la Rosette J.J.M.C.H., Ten Kate F.J.W., Laguna M.P. and Wijkstra H.
Date	:	11-11-2010
Name	:	Lammens C.R.M. (NKI)
Title	:	Living with Li-Fraumeni syndrome & Von Hippel-Lindau disease.
University	:	University of Amsterdam
(co)Promotors	:	Aaronson N.K., Bleiker E.M.A. and Verhoef S.
Date	:	05-11-2010
Name	:	Ljumanovic R. (VUmc)
Title	:	Prognostic value of MRI in head and neck oncology.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Castelijns J.A., Leemans C.R., Langendijk J.A. and Hoekstra O.S.
Date	:	23-11-2010
Name	:	Maas C. (NKI)
Title	:	Molecular regulation of death receptor- and DNA damage-induced apoptosis.
University	:	University of Amsterdam
(co)Promotors	:	Borst J. and Bernards R.
Date	:	10-09-2010
Name	:	Marees T. (VUmc)
Title	:	Second primary malignancies and excess mortality after retinoblastoma.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	van Leeuwen F.E., Ringens P.J., Moll A.C. and Imhof S.M.
Date	:	29-01-2010

Name	:	<b>Meijerink M.</b> (VUmc)
Title	:	Novel dynamic imaging methods and image-guided ablative therapies of liver tumors.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Van Kuijk C., Van Waesberghe J.H.T.M. and Van Tol M.P.
Date	:	18-06-2010
Name	:	<b>Michaloglou C.</b> (VUmc)
Title	:	The role and mechanism of BRAF600-induced senescence-like proliferative arrest of melanocytic naevi in preventing melanoma-genesis.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Mooi W.J. and Peeper D.S.
Date	:	21-06-2010
Name	:	<b>Noordhuis P.</b> (VUmc)
Title	:	Molecular aspects of 5-fluorouracil and oxaliplatin activity.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Peters G.J. and Van Groeningen C.J.
Date	:	21-10-2010
Name	:	<b>Paramita D.</b> (VUmc)
Title	:	Humoral immune responses to Epstein-Barr Virus early antigen and tumor associated antigen in nasopharyngeal carcinoma.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Middeldorp J.M., Haryana S.M. and Tan B.
Date	:	09-06-2010
Name	:	<b>Peperzak V.</b> (NKI)
Title	:	Mechanisms underlying CD27-CD70 costimulation.
University	:	University of Amsterdam
(co)Promotors	:	Borst J.
Date	:	12-02-2010
Name	:	<b>Pijpe A.</b> (NKI)
Title	:	Modifiers of breast cancer risk in BRCA1/2 mutation carriers - Diagnostic radiation, physical activity, and body weight.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Van Leeuwen F.E. and Rookus M.A.
Date	:	02-07-2010
Name	:	<b>Postma C.</b> (VUmc)
Title	:	Chromosomal instability in Colorectal Cancer.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meijer G.A., Carvalho B. and Ylstra B.
Date	:	12-11-2010
Name	:	<b>Reijmers R.</b> (AMC)
Title	:	Heparan sulfate proteoglycans in B cell maturation and myeloma plasma cell survival.
University	:	University of Amsterdam
(co)Promotors	:	Pals S.T. and Spaargaren M.
Date	:	29-09-2010
Name	:	<b>Revet I.M.</b> (AMC)
Title	:	Homeobox genes in neuroblastoma.
University	:	University of Amsterdam
(co)Promotors	:	Versteeg R. and Geerts D.
Date	:	20-05-2010
Name	:	<b>Ruijs M.W.G.</b> (NKI)
Title	:	Li-Fraumeni syndrome, clinical and molecular genetics.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Kate L.P., Meijers-Heijboer E.J., van 't Veer L.J. and Menko F.H.
Date	:	05-02-2010

Name	:	<b>Schaaij-Visser T.B. (VUmc)</b>
Title	:	Biomarker discovery for head and neck cancer - A proteomics approach.
University	:	Universiteit van Utrecht
(co)Promotors	:	Heck A.J.R., Brakenhoff R.H. and Slijpers M.
Date	:	20-01-2010
Name	:	<b>Schilder C.M.T. (NKI)</b>
Title	:	Effects of tamoxifen and exemestane on cognitive functioning; a study in postmenopausal breast cancer patients.
University	:	University of Amsterdam
(co)Promotors	:	Van Dam F.S.A.M., Boogerd W. and Schagen S.B.
Date	:	04-06-2010
Name	:	<b>Scholten K.B.J. (VUmc)</b>
Title	:	Adoptive transfer of tumor specific T-cells for the treatment of cervical cancer: Generation of HPV specific T-cells.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Meijer C.J.L.M., Schreurs M.W.J. and Hooijberg E.
Date	:	02-12-2010
Name	:	<b>Smitsmans M.H.P. (NKI)</b>
Title	:	Towards image-guided radiotherapy of prostate cancer.
University	:	University of Amsterdam
(co)Promotors	:	Van Herk M. and Lebesque J.V.
Date	:	10-10-2010
Name	:	<b>Spoelstra F.O.B. (VUmc)</b>
Title	:	Optimization of image-guided radiotherapy (IGRT) for lung cancer.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Senan S., Slotman B.J. and Sörnsen de Koste J.R.
Date	:	15-01-2010
Name	:	<b>Tijink B.M. (VUmc)</b>
Title	:	Targeted therapies in head and neck cancer.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Van Dongen G.A.M.S., Leemans C.R. and De Bree R.
Date	:	19-02-2010
Name	:	<b>Tuynman J.B. (AMC)</b>
Title	:	Molecular pathways and interventions in GI cancer.
University	:	University of Amsterdam
(co)Promotors	:	Richel D.J., Van Lanschot J.B. and Peppelenbosch M.P.
Date	:	05-07-2010
Name	:	<b>Van de Steeg E. (NKI)</b>
Title	:	Physiological and pharmacological functions of OATP1A/1B transporters.
University	:	University Utrecht
(co)Promotors	:	Beijnen J.H. and Schinkel A.H.
Date	:	14-04-2010
Name	:	<b>Van den Boorn J.G. (AMC)</b>
Title	:	Vitiligo pathogenesis and immunotherapy of melanoma.
University	:	University of Amsterdam
(co)Promotors	:	Bos J.D., Melief C.J. and Luiten R.M.
Date	:	06-07-2010
Name	:	<b>Van den Broek F.J.C. (AMC)</b>
Title	:	The role of endoscopic imaging for an improved diagnosis of colorectal neoplasia.
University	:	University of Amsterdam
(co)Promotors	:	Fockens P., Dekker E. and Reitsma J.B.
Date	:	29-01-2010

Name	:	<b>Van der Lelij P. (VUmc)</b>
Title	:	The role of sister chromatid cohesion in cohesinopathies, DNA damage response and carcinogenesis.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Joenje H. and De Winter J.P.
Date	:	07-10-2010
Name	:	<b>Van Heijst J.W.J. (NKI)</b>
Title	:	Tracing T cell differentiation by genetic barcoding.
University	:	University Leiden
(co)Promotors	:	Schumacher T.N.M.
Date	:	24-06-2010
Name	:	<b>Van Riel J.M.G.H. (VUmc)</b>
Title	:	Hepatic arterial chemotherapy for liver metastases of colorectal cancer.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Boven E., Peters G.J. and Van Groeningen C.J.
Date	:	17-09-2010
Name	:	<b>Van Zeeburg H.J.T. (VUmc)</b>
Title	:	Oncolytic adenoviruses for treatment of oral cancer and precancer in sporadic and genetically predisposed patients.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Brakenhoff R.H., Leemans C.R. and Van Beusechem V.W.
Date	:	16-11-2010
Name	:	<b>Vermeulen L. (AMC)</b>
Title	:	Cancer stem cells - a numbers game?
University	:	University of Amsterdam
(co)Promotors	:	Medema J.P. and Richel D.J.
Date	:	04-11-2010
Name	:	<b>Vormer T.L. (NKI)</b>
Title	:	Tumor suppression by retinoblastoma proteins: interacting proteins and cooperating pathways.
University	:	Vrije Universiteit Amsterdam
(co)Promotors	:	Te Riele H.
Date	:	26-11-2010
